These tables were prepared by the Center for Behavioral Health Statistics and Quality (CBHSQ), Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS), and by RTI International, a registered trademark and a trade name of Research Triangle Institute, Research Triangle Park, North Carolina. Work by RTI was performed under Contract No. HHSS283201300001C. Contributors and reviewers at RTI listed alphabetically include Kevin T. Adams, Tricia Adams, Jeremy Aldworth, Katherine J. Asman, Stephanie N. Barnett, Ellen Bishop, Michael R. Bradshaw, Kristen Brown, Lisa A. Carpenter, Pinliang (Patrick) Chen, Chuchun Chien, Devon S. Cribb, Lanting Dai, Teresa R. Davis, Susan L. Edwards, Glynis S. Ewing, Barbara J. Felts, Misty S. Foster, Peter A. Frechtel, Julia M. Gable, Gina M. Geercken, Harper Gordek, Paxton S. Gorsage, Rebecca K. Granger, Wafa Handley, Rachel M. Harter, Erica L. Hirsch, David Hunter (Project Director), Phillip S. Kott, Larry A. Kroutil, Jeffrey S. Laufenberg, Philip K. Lee, Dan Liao, Nicole Mack, Peilan Chen Martin, Dexter McNutt, Andrew S. Moore, Kayla J. Nowak, Lisa E. Packer, Michael R. Pemberton, Jeremy D. Porter, Rosanna S. Quiroz, Jessica L. Roycroft, Jill W. Ruppenkamp, Ana Saravia, Neeraja S. Sathe, Jennifer H. Schoden, Kathryn E. Spagnola, Jiantong (Jean) Wang, Lauren K. Warren, Matthew J. Westlake, and Carol L. Woodell. Contributors at SAMHSA listed alphabetically include Rebecca Ahrnsbrak, Jonaki Bose, Barbara Forsyth, Sarra L. Hedden, Joel Kennet, Rachel N. Lipari, Grace E. Medley, Eunice Park-Lee, Kathryn Piscopo, Peter Tice (Project Officer), and Matthew R. Williams. At RTI, Farrah Bullock Mann and Brenda K. Porter formatted the tables; Amber M. Rohloff and Richard S. Straw provided editorial assistance; and Teresa F. Bass, Debbie F. Bond, Kimberly H. Cone, Daniel Occoquan, Pamela Couch Prevatt, and Pamela G. Tuck provided web conversion and/or document production support.

Introduction

Results from the 2016 National Survey on Drug Use and Health: Detailed Tables is a collection of tables presenting national estimates from the National Survey on Drug Use and Health (NSDUH).¹ These tables present information for youths aged 12 to 17 and adults 18 or older (separately and combined) on drug, alcohol, and tobacco use, as well as substance use disorder (SUD) (also referred to as dependence or abuse), risk and availability of substance use, treatment, health topics, and alcohol consumption.² For youths, additional topics include youth experiences and measures on mental health service utilization, major depressive episode (MDE), and treatment for depression (among youths with MDE). For adults, additional topics include measures on any mental illness (AMI), serious mental illness (SMI), AMI excluding SMI, mental health service utilization (i.e., treatment or counseling for mental health issues), suicidal thoughts and behaviors, MDE, treatment for depression (among adults with MDE), and serious psychological distress (SPD). Measures such as the co-occurrence of mental disorders with substance use or with SUDs also are presented for both adults and youths. Measures of these behaviors and characteristics are presented by a variety of demographic, geographic, and other variables. The estimates in the tables include prevalence rates of the behaviors, numbers of persons engaging in these behaviors, and other measures. A small number of measures are no longer comparable with measures from previous years, but the 2-year trend table format was retained in the detailed tables in order to help illustrate this lack of comparability.

A summary report, *2016 National Survey on Drug Use and Health: Methodological Summary and Definitions*, accompanies these detailed tables.³ In that report, information on key definitions (i.e., see the glossary in its Section D) can be found for many of the measures and terms used in these detailed tables and in other 2016 NSDUH documents, along with further analytic details on these measures (see its Section B in particular) and the survey. Where relevant, the glossary provides cross-references between terms and specific question wording for clarity.

In addition to these detailed tables, three first findings reports (FFRs) from the 2016 NSDUH that are focused on key substance use and mental health indicators, receipt of services for substance use and mental health issues among adults, and risk and protective factors and initiation of substance use are scheduled to be made available online in September 2017 at <https://www.samhsa.gov/data/>.

¹ Starting with the 2015 NSDUH, the detailed tables are a combination of the prior detailed tables and the mental health detailed tables. For information on mapping current sections back to pre-2015 sections, refer to the Table Numbering Section of the 2016 detailed tables' introduction at <https://www.samhsa.gov/data/>.

² Starting with the 2016 NSDUH, the detailed tables include measures for past year and past month misuse of opioids (heroin use or pain reliever misuse) and opioid use disorder. For more information on potential measurement issues for pain relievers, see Sections B.4.1 and B.4.2 in Section B of the following reference: Center for Behavioral Health Statistics and Quality. (2017). *2016 National Survey on Drug Use and Health: Methodological summary and definitions*. Retrieved from <https://www.samhsa.gov/data/>

³ See the reference in footnote 2.

SURVEY DESIGN

A coordinated sample design was developed for the 2014 through 2017 NSDUHs. It is a state-based design with an independent, multistage area probability sample within each state and the District of Columbia. As a result, states are viewed as the first level of stratification. Each state is further stratified into approximately equally populated state sampling regions (SSRs). Creation of each year's multistage area probability sample then involves selecting census tracts within each SSR, census block groups within census tracts, and area segments (i.e., a collection of census blocks) within census block groups. Finally, dwelling units (DUs) are selected within segments, and within each selected DU, up to two residents who are at least 12 years old are selected for interviewing.

This partitioning of states divided the United States into a total of 750 SSRs, which results in 750 degrees of freedom for most national estimates presented in these detailed tables. Estimates for mean age of first use (AFU) and average number of days used are the exception. These estimates are treated differently because of the possibility of smaller sample sizes; therefore, they potentially belong to fewer variance estimation strata, and cell-specific degrees of freedom are used. For more information on degrees of freedom, see Section 6 of the 2015 NSDUH statistical inference report.⁴

The coordinated design for 2014 through 2017 includes a 50 percent overlap in third-stage units (area segments) within each successive 2-year period from 2014 through 2017. The designed overlap slightly increases the precision of estimates of year-to-year trends because of the expected small but positive correlation resulting from the overlapping area segments between successive survey years. The design also allocates more interviews to the largest 12 states (compared with the 1999 to 2013 design). Making the sample sizes more proportional to the state population sizes improves the precision of NSDUH estimates.

Starting in 2014, the allocation of the sample by age group changed. In the 2005 through 2013 NSDUHs, the sample was allocated equally between three age groups: 12 to 17, 18 to 25, and 26 or older. Starting in 2014, the allocation of the NSDUH sample became 25 percent for adolescents aged 12 to 17, 25 percent for adults aged 18 to 25, and 50 percent for adults aged 26 or older. The sample of adults aged 26 or older was further divided into three subgroups: aged 26 to 34 (15 percent), aged 35 to 49 (20 percent), and aged 50 or older (15 percent). These age allocation changes were designed to reflect more closely the actual population distributions by state and age group, so that the precision of estimates overall and for older age groups could be improved.

BREAKS IN TRENDS DUE TO QUESTIONNAIRE AND OTHER CHANGES

NSDUH has undergone changes over the years in order to improve the quality of its data and to address the changing needs of policymakers and researchers with regard to substance use and mental health issues. These changes affect the level of comparability across years, and many times cause breaks in trends. Information pertaining to some of the more major changes over the

⁴ Center for Behavioral Health Statistics and Quality. (2017). *2015 National Survey on Drug Use and Health: Methodological resource book (Section 13, Statistical inference report)*. Retrieved from <https://www.samhsa.gov/data/>

years as they pertain to the detailed tables are summarized below. For more detailed information on these revisions and revisions that do not pertain to the detailed tables, see Sections B and C of the *2016 National Survey on Drug Use and Health: Methodological Summary and Definitions*.⁵

2016 Changes and Impact

Changes to Specific Prescription Drugs

To account for changing popularity and availability of specific prescription drugs, the survey has been designed to allow for the addition and removal of specific prescription drugs from year to year.⁶ These specific prescription drugs were further categorized into subtypes and presented as such in the detailed tables. The following specific prescription drugs from 2015 were removed because they had been discontinued or were reported infrequently in the 2015 data: Roxicet[®], Actiq[®], buspirone, hydroxyzine, meprobamate, and Ritalin[®] SR. Additionally, buprenorphine plus naloxone was added to the prescription pain relievers section. The impact of these changes was evaluated, and it was determined that the removal and addition of these drugs did not change the comparability of the subtype or overall pain reliever estimates presented in the detailed tables.

The any past year use of prescription pain reliever response option for Tylenol[®] with codeine 3 or 4 was modified to clarify that this drug was not the same as over-the-counter Tylenol[®] in order to reduce potential confusion between these two similarly sounding drug names. As expected, there was a reduction in reports of using Tylenol[®] with codeine 3 or 4. The impact assessment confirmed that codeine products were not comparable between 2015 and 2016, but the overall pain relievers category remained comparable. The lack of comparability for codeine products has been noted in the detailed tables that present estimates for prescription pain relievers, opioids, and prescription psychotherapeutics.

Changes to Education Measures

In 2016, the question about current school enrollment was reworded to clarify the question for younger respondents. Instead of asking "Are you now attending or are you currently enrolled in school?" the question was revised to say "Do you go to school?" The revised question also instructs respondents to answer "yes" if they were "on holiday or break from school, such as spring break or summer vacation, but plan to return when the break is over." A decrease in the percentage of adolescents aged 12 to 17 who reported currently being enrolled in school was seen between 2015 and 2016. The current school enrollment data are used in the creation of the college enrollment estimates, which for the 2016 detailed tables are considered comparable based on an impact assessment.

Additionally, text defining what is included in the term "school" was added for consistency to a different current school enrollment question asked specifically of youths. These current enrollment data are used to subset the student characteristic, adult involvement, and

⁵ See the reference in footnote 2.

⁶ Any specific drug added or removed from the survey affects the drug screener questions and the main drug module questions.

youth perceptions' tables in Section 3 of the detailed tables. After an assessment analysis, it was determined that the additional text had a negligible effect on the resulting data.

Changes to Driving Under the Influence Measures

Starting with the 2016 NSDUH, respondents who reported past year alcohol use or selected illicit drug use were asked individual questions about driving under the influence of each substance they indicated using. The selected illicit drugs include marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, and methamphetamine. Previously, questions about driving under the influence of illicit drugs did not specify individual drugs and were asked of past year users of illicit drugs including prescription psychotherapeutics. After analyzing the 2016 estimates for driving under the influence and comparing the results with the 2015 estimates, it was determined that breaks in trends occurred for all measures of driving under the influence, including the measure of driving under the influence of alcohol, only because of associated context effects from other changes in this section. (A context effect may be said to take place when the response to a question is affected by information that is not part of the question itself.)

Changes to OxyContin® and Oxycodone Product Estimates

Starting with the 2016 NSDUH, OxyContin® and Oxycodone estimates in the pain reliever subtype detailed tables are based on the imputation-revised OxyContin® use and misuse variables. In the 2015 detailed tables, these estimates were based on the edited OxyContin® use and misuse variables. As a result, the 2015 estimates in the 2016 detailed tables may not match those presented in the 2015 detailed tables. Although the estimates based on the edited OxyContin® use and misuse variables are not incorrect, the estimates based on the imputation revised OxyContin® use and misuse variables are recommended.

Changes to Standard Error Estimates

As with previous detailed tables, a "mixed" method approach for calculating standard errors was implemented in the 2016 detailed tables. Standard errors for controlled domains are calculated assuming no sampling error while standard errors for uncontrolled domains are calculated directly in SUDAAN®.⁷ Controlled domains are domains where the weight calibration process forces the domain size estimates to match their respective U.S. Census Bureau population estimates. For more information on calculating standard errors in the detailed tables and controlled domains, see Section 5 of the 2015 NSDUH statistical inference report.⁸ In the 2015 detailed tables numbered 1.28 to 1.87, some three-way interactions were inadvertently treated as controlled domains. Per NSDUH standard practices for detailed tables, three-way interactions should be treated as uncontrolled. These three-way interactions were treated as uncontrolled in the 2016 detailed tables numbered 1.29 to 1.66; therefore, the standard errors of the total estimates for the non-Hispanic white and non-Hispanic black categories may be different from those presented in the 2015 detailed tables.

⁷ See the following reference: RTI International. (2012). *SUDAAN®*, Release 11.0 [computer software]. Research Triangle Park, NC: Author.

⁸ See the reference in footnote 4.

2015 NSDUH Redesign Changes and Impact

The NSDUH questionnaire underwent a partial redesign in 2015. The prescription drug questions for pain relievers, tranquilizers, stimulants, and sedatives were redesigned to shift the focus from lifetime misuse to past year misuse. Additionally, questions were added about any past year prescription drug use, rather than just misuse. A separate section with methamphetamine questions was added, replacing the methamphetamine questions that were previously asked within the context of prescription stimulants. Substantial changes were also made to questions about smokeless tobacco, binge alcohol use, inhalants, and hallucinogens.

These changes led to breaks in the comparability of 2015 estimates with estimates from prior years. Consequently, these changes affected overall summary measures, such as any illicit drug use, and other measures, such as initiation, SUDs, and substance use treatment. Additionally, certain demographic items were changed as part of the partial redesign. Employment questions were moved from the computer-assisted personal interviewing (CAPI) section to the audio computer-assisted self-interviewing (ACASI) section of the questionnaire. Education questions were updated, and new questions were added on disability, English-language proficiency, sexual orientation of adults, and military families.

Due to the breaks in comparability, many estimates from years prior to 2015 have been noted in the detailed tables as not comparable due to methodological changes. These include measures of overall illicit drug use; use of hallucinogens, inhalants, and methamphetamine; misuse of psychotherapeutics; binge and heavy alcohol use overall and among females; smokeless tobacco use; and substance use treatment. Additionally, 2015 estimates by education and current employment have been noted as not comparable with prior years. Other topics, such as the mental health topics, did not undergo major changes and therefore are considered comparable.

Any use of prescription drugs includes both use as directed by a doctor and misuse. Misuse includes use in any way not directed by a doctor, including (a) use without a prescription of one's own; (b) use in greater amounts, more often, or longer than told to take a medication; or (c) use in any other way that was not directed by a doctor. Starting in 2015, the detailed tables no longer use the term "nonmedical use" and instead use the term "misuse." For more specific information about each of the 2015 NSDUH changes, see Section C of the *2015 National Survey on Drug Use and Health: Methodological Summary and Definitions*.⁹

Starting with the 2015 NSDUH, there was a change in the focus of the questions for specific prescription psychotherapeutic drugs. The focus shifted from lifetime use of all respondents to use more than 12 months ago among respondents who last misused any prescription psychotherapeutic drug in any of the four categories (pain relievers, tranquilizers, stimulants, or sedatives). This shift appeared to cause an underreporting of lifetime prescription drug misuse compared with prior years. This underreporting might be because respondents are no longer presented with examples of drugs that formerly were available by prescription in the United States but are no longer available and because many fewer questions ask about lifetime

⁹ Center for Behavioral Health Statistics and Quality. (2016). *2015 National Survey on Drug Use and Health: Methodological summary and definitions*. Retrieved from <https://www.samhsa.gov/data/>

use. These respondents who did not report misuse that occurred more than 12 months ago would be misclassified as still being "at risk" for initiation of misuse of prescription drugs in that psychotherapeutic category (i.e., individuals who initiated misuse more than 12 months ago are no longer at risk for initiation). For this reason, starting with the 2015 detailed tables, percentages for initiation of misuse of psychotherapeutic drugs among individuals who were at risk for initiation are not shown. The tables also do not show estimates for lifetime psychotherapeutic drug use. For more specific information about each of the 2015 changes, see Sections B.4.1 and B.4.2 in Section B of the *2016 National Survey on Drug Use and Health: Methodological Summary and Definitions*.¹⁰

In order to evaluate the changes from the 2015 redesign, a 12-month questionnaire redesign impact assessment was completed.¹¹ Analyses were conducted on a subset of variables associated with the detailed tables to check for potential trend breaks, including the risk and availability measures. After significant differences between 2015 and previous years were found for 16 of 17 raw risk and availability variables during an initial analysis, logistic regression models were run on dichotomous recodes. All of the perceived great risk of harm associated with the substance use measures yielded a significant increase in 2015 compared with previous years. Extreme weights and missingness rates were investigated to ensure that these were not the cause of the difference. It was determined that these measures are not comparable for years prior to 2015.

Previous Mental Health Changes and Impact

Because of additional survey improvements and questionnaire changes to the mental health sections between 2002 and 2012, it is not possible to assess long-term trends for all of the mental health issues. A summary of the changes is described below, but for more detailed information on revisions, see Sections B.4.6 and B.4.7 in Section B of the *2016 National Survey on Drug Use and Health: Methodological Summary and Definitions*.¹²

In 2012, revisions were made to the 2008 to 2011 past year AMI and SMI estimates. Past year mental illness estimates for 2008 through 2011 found in mental health detailed tables and reports published prior to 2012 were based on a prediction model for mental illness developed using the 2008 clinical data from the Mental Health Surveillance Study (MHSS). An improved model was used for estimates starting in 2012. For the 2012, 2013, and 2014 mental health detailed tables and the 2015 and 2016 detailed tables, the 2012 to 2016 estimates and the previous 2008 to 2011 estimates are based on the 2012 model.

It is recommended that the mental illness variables derived from the 2012 model not be used when analyzing variables for past year suicidal thoughts, past year MDE, the Kessler-6 (K6) mental disorder scale, or the World Health Organization Disability Assessment Schedule (WHODAS) scale, and it is also recommended that the mental illness variables derived from the 2012 model not be used when analyzing other closely linked variables (including past year

¹⁰ See the reference in footnote 2.

¹¹ See the following reference: Center for Behavioral Health Statistics and Quality. (2017). *2015 National Survey on Drug Use and Health: Methodological Resource Book (Section 15, 2015 Questionnaire Redesign Impact Assessment, final report, Volumes 1 and 2)*. Retrieved from <https://www.samhsa.gov/data/>

¹² See the reference in footnote 2.

suicide attempts, past year suicide plans, medical treatment for suicide attempts, lifetime MDE, SPD, or components used in the K6 or WHODAS scales). For detailed information on model revisions to the mental illness items, see Section B.4.7 in Section B of *2016 National Survey on Drug Use and Health: Methodological Summary and Definitions*.¹³ As with the mental illness estimates based on the 2008 model, the mental illness estimates based on the 2012 model are not comparable with SMI estimates produced from NSDUH data prior to 2004, and SMI estimates were not produced from 2004 to 2007; thus, long-term trend estimates are not available for SMI.

Because of the 2008 questionnaire revisions to the mental health module, several estimates in 2008 (MDE and past 12-month SPD) were affected by context effects. However, an adjustment for the questionnaire changes was applied to estimates of MDE for 2005 to 2008. For more detailed information, see Section B.4.8 in Section B of the *2016 National Survey on Drug Use and Health: Methodological Summary and Definitions*.¹⁴ Therefore, long-term trend estimates for these two measures are available from 2005 through 2016. No additional questionnaire changes from 2009 to 2016 have led to changes in these adult measures. Moreover, no questionnaire changes have been implemented that affected the adult mental health service utilization questions; therefore, estimates of mental health service utilization presented in these detailed tables reflect trends from 2002 to 2016. The only exceptions are estimates that combine mental health data with other topics that are considered not comparable.

No questionnaire revisions affected MDE for youths aged 12 to 17; thus, long-term trend estimates are available from 2004 through 2016. However, revisions to the youth mental health service utilization module of the 2009 NSDUH questionnaire resulted in new estimates and a discontinuation of trends for several items on the source of mental health services. New questions regarding the receipt of mental health services from juvenile justice sources were added in 2009, and questions regarding services from educational sources were revised and are not comparable with estimates prior to 2009.

Changes to Previously Published 2006 to 2010 Estimates

During regular data collection and processing checks for the 2011 NSDUH, data errors were identified. These errors affected the data for Pennsylvania (2006 to 2010) and Maryland (2008 and 2009). Cases with erroneous data were removed from the data files, and the remaining cases were reweighted to provide representative estimates. The errors had minimal impact on the national estimates and no effect on direct estimates for the other 48 states and the District of Columbia. In reports where model-based small area estimation (SAE) techniques are used, estimates for all states may be affected, even though the errors were concentrated in only two states. In reports that do not use model-based estimates, the only estimates appreciably affected are estimates for Pennsylvania, Maryland, the mid-Atlantic division, and the Northeast region.

The 2016 detailed tables and 2016 FFRs do not include state-level, model-based, or division-level estimates. However, the 2016 detailed tables do include estimates for the Northeast region. Estimates based on 2006 to 2010 data may differ from previously published estimates. Tables and estimates based only on data since 2011 are unaffected by these data

¹³ See the reference in footnote 2.

¹⁴ See the reference in footnote 2.

errors. All affected tables (i.e., tables with estimates based on 2006 to 2010 data) contain a note to indicate this to the user.

Caution is advised when comparing data from older reports with data from more recent reports that are based on corrected data files. As discussed above, comparisons of estimates for Pennsylvania, Maryland, the mid-Atlantic division, and the Northeast region are of most concern, while comparisons of national data or data for other states and regions are essentially still valid. The Center for Behavioral Health Statistics and Quality (CBHSQ) within the Substance Abuse and Mental Health Services Administration (SAMHSA) does not recommend making comparisons between unrevised 2006 to 2010 estimates and estimates based on data for 2011 and subsequent years for the areas of greatest concern.

New 2002 Baseline

Methodological differences implemented in the 2002 NSDUH affected the comparability of the 2002 estimates with prior surveys. Some of the changes included the addition of a \$30 incentive, a change in the survey name from the National Household Survey on Drug Abuse (NHSDA) to the current name, and updated population data from the 2000 decennial census being incorporated into the sample weights. Because of these improvements in the 2002 NSDUH, the 2002 data constitute a new baseline for tracking trends in substance use and other measures. Therefore, estimates from the 2002 through 2016 surveys should not be compared with estimates from the 2001 or earlier surveys to examine changes over time. In addition to the 2002 baseline change, the aforementioned 2015 and 2016 changes may also constitute a new baseline for various measures.

Methodology changes throughout NSDUH's history make it difficult to assess long-term trends from tables presenting data from 1971 to 2016. However, it is instructive to compare NSDUH estimates from 1971 to 2016 by "piecing together" the data from time periods for which data are comparable. Specifically, valid trend comparisons can be made for 1971 to 1998, 1999 to 2001, and 2002 to 2016. With this approach, comparisons between 1998 and 1999, and between 2001 and 2002, should be made with caution because they are potentially biased due to changes in methods. Nevertheless, when these data are combined in a single presentation, it often becomes clear that the effects of the changes in methods are small compared with the major shifts in substance use prevalence that have occurred over the past five decades.

TABLE PRESENTATION

Although the majority of the detailed tables present estimates from the 2015 and 2016 NSDUHs, some tables include only estimates from the 2016 NSDUH. Additionally, due to the 2016 questionnaire changes, two tables presenting estimates for driving under the influence of various substances are formatted to present 2 years of data, but all of the 2015 estimates are noted as being not comparable ("nc") or not reported ("nr"). The tables are formatted to allow the ability to present 2 years of estimates in subsequent years when more data are available. As more comparable years of data become available, multiyear trend tables for both measures that had a break in trend in 2015 due to the redesign and the driving under the influence measures mentioned earlier will be added. Also included are a number of tables that present data from prior surveys in the series, including a section of tables presenting data mainly from 2002 to

2016 or 2008 to 2016, with a few tables with data with various years starting from 2004 to 2009 and a couple of tables presenting data from 1971 to 2016. The following sections provide information on how the tables are organized, the types of tables that are available, information about specific indicators used for the 2016 detailed tables, information on missingness, information on the impact of rounding on estimates presented in the tables, and how totals are to be interpreted within the tables.

Table Numbering

The detailed tables are numbered using a three-part numbering scheme (e.g., 1.15A). The first part of the table number (1.15A) is the subject matter section to which a particular table belongs. The second part (1.15A) is the number of the table within a particular section. The third part (1.15A) is a table type indicator, an alphabetic letter appended to the table number. Each table number, as explained below, has multiple table types. Tables are numbered sequentially within each subject matter section. Identical tables across years may not be assigned the same table number each year.

In 2014, there were two sets of detailed tables—the detailed tables and the mental health detailed tables. The 2014 detailed tables included eight sections, and the 2014 mental health detailed tables contained three sections. A crosswalk has been included below that shows the detailed tables by section in the 2014 detailed tables and the sections within the 2015 and 2016 detailed tables.

2014 Table Section	2015 and 2016 Table Section
Detailed Tables	
Sections 1 to 7	Sections 1 to 7
Section 8 (Sample Size and Population Tables)	Section 12
Mental Health Detailed Tables	
Section 1 (Adult Mental Health 2-Year Tables)	Section 8
Section 1 (Adult Mental Health Multiyear Trend Tables)	Section 10
Section 2 (Youth Mental Health 2-Year Tables)	Section 9
Section 2 (Youth Mental Health Multiyear Trend Tables)	Section 11
Section 3 (Sample Size and Population Tables)	Section 12

The 12 subject matter sections and the number of tables per section in 2016 are as follows:

Section 1: Illicit Drug Use Tables – 1.1 to 1.116

Section 2: Tobacco Product and Alcohol Use Tables – 2.1 to 2.57

Section 3: Risk and Protective Factor Tables – 3.1 to 3.33

Section 4: Incidence Tables – 4.1 to 4.13

Section 5: Substance Use Disorder and Treatment Tables – 5.1 to 5.54

Section 6: Miscellaneous Tables – 6.1 to 6.90

Section 7: Trend Tables – 7.1 to 7.40

Section 8: Adult Mental Health Tables – 8.1 to 8.85

Section 9: Youth Mental Health Tables – 9.1 to 9.15

Section 10: Adult Mental Health Trend Tables – 10.1 to 10.41

Section 11: Youth Mental Health Trend Tables – 11.1 to 11.6

Section 12: Sample Size and Population Tables – 12.1 to 12.9

Table Types and Purpose

The table type indicators are primarily defined as follows; however, some exceptions do exist and are noted in subsequent text.

Table Type	Purpose of the Table
A	Presents estimates of the numbers of persons exhibiting the specified behavior or characteristic (e.g., substance use) in the populations described by the column and row headings.
B	Presents estimates of the percentages of persons exhibiting the specified behavior or characteristic (e.g., substance use) in the populations described by the column and row headings.
C	Presents the standard error associated with each of the estimates in the "A" tables.
D	Presents the standard error associated with each of the estimates in the "B" tables.
N	Presents the number of cases in the specified NSDUH sample with the characteristics defined by the column and row headings.
P	Presents the <i>p</i> values from tests of the statistical significance of differences between columns in the "B" tables.

The majority of tables within the detailed tables contain five table types (A, B, C, D, and P) as defined above. Note that table type N is used exclusively within Section 12 to display the sample size counts. Also, table type P is excluded from sets of tables where no significance testing is performed between 2016 and previous years. This includes tables that show only a single year of data and tables where all of the pre-2016 NSDUH estimates are deemed not comparable (i.e., estimates replaced with "nc" as defined below) or are not reported (i.e., estimates replaced with "nr" as defined below) within a table. Exceptions to this organization are noted as follows:

- Section 3 (Risk and Protective Factor Tables) includes tables for which only table types A, B, C, and D are produced ([Tables 3.22 to 3.33](#)). These tables present estimates for the 2016 NSDUH only; thus, these are not trend tables, so significance tests between years are not relevant and table type P is not applicable.
- Section 4 (Incidence Tables) contains both tables for which only table types A and C are produced and tables for which only table types B, D, and P are produced. Specifically, one subset of tables ([Tables 4.9 to 4.12](#)) includes table types A and C. This subset of tables presents the number of past year initiates in table type A and the associated

standard errors in table type C. The remaining Section 4 tables include only table types B, D, and P. [Tables 4.1 to 4.8](#) present numbers and percentages of past year initiates in table type B, associated standard errors for each of these estimates in table type D, and *p* values from tests of statistical differences between years in table type P. [Table 4.13](#) presents the mean age for past year initiates in table type B, associated standard errors in table type D, and *p* values from tests of statistical differences between years in table type P.

- Section 5 (Substance Use Disorder and Treatment Tables) includes one subset of tables for which table type A contains both numbers and percentages, where the percentages are repeated in the B table and another subset of tables for which only table types A, B, C, and D are produced. Specifically, one subset of tables ([Tables 5.42 to 5.45, 5.47 and 5.48, and 5.50 and 5.51](#)) presents estimates among all persons and percentages among persons who needed treatment in the type A tables, where the percentages are repeated in the B tables. The other subset of tables ([Tables 5.53 and 5.54](#)) present estimates for the 2016 NSDUH only; thus, these are not trend tables, so significance tests between years are not relevant and table type P is not applicable.
- Section 6 (Miscellaneous Tables) contains both tables for which estimates are repeated in the A and B tables and tables for which only table types A, B, C, and D are produced. Specifically, one subset of tables ([Tables 6.1 to 6.8](#)) repeats the estimates for the average number of days used in the A and B tables and in the C and D tables. The other subset of tables ([Tables 6.84 and 6.85](#)) includes only table types A, B, C, and D. These tables present estimates for driving under the influence of alcohol or selected illicit drugs, which are unavailable or not comparable with estimates from 2015; thus, significance tests between years are not relevant and table type P is not applicable.
- Section 7 (Trend Tables) contains one subset of tables for which only table types B and D are produced and one subset of tables for which only table types B, D, and P are produced. Specifically, one subset of tables ([Tables 7.39 and 7.40](#)) are multiyear tables that present estimated percentages for 1971 to 2016 in table type B and associated standard errors in table type D. The estimated total number of users and associated standard errors are not presented, nor are between-year significance tests implemented; thus, table types A, C, and P are not used. The other subset of tables ([Table 7.33](#)) includes multiyear tables that involve only table types B, D, and P. [Table 7.33](#) presents the mean age at first substance use for past year initiates in table type B, associated standard errors for each of these estimates in table type D, and *p* values from tests of statistical differences between years in table type P.
- Section 12 (Sample Size and Population Tables) contains only table types A, C, and N. Population counts, standard errors, and sample sizes are displayed in table types A, C, and N, respectively. Percentages of the population and associated standard error tables are not provided in this section.

Table Indicators

Each 2016 detailed table, including those for all of the above table types, contains the following definitional footnote, regardless of whether any or all of the indicators were used in the table:

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

The "* = low precision" portion of the footnote indicates an estimate is being suppressed (i.e., not shown) due to low precision.

The "-- = not available" portion of the footnote indicates that for the given year, the questions used to produce the estimates were not available. For example, prior to 2016, respondents were not asked about specifically driving under the influence of marijuana. Thus, for 2015 and earlier years, those estimates are shown with the "--" notation.

The "da = does not apply" portion of the footnote indicates that the question or estimate does not apply to a certain group. For example, in pregnancy tables, the trimester estimates are shown as "da" for overall females and nonpregnant females, and in the incidence tables that show numbers in thousands and percentages in the same table, the *p* values for the numbers in thousands are replaced with "da" because the detailed tables only show *p* values of tests of differences of percentages.

The "nc = not comparable due to methodological changes" portion of the footnote indicates that estimates for the measure do exist for prior years, but they are no longer comparable with the current year estimate. For example, illicit drug use estimates are available for all years in the detailed tables, but the 2015 and 2016 estimates are not comparable with the 2002 through 2014 estimates due to questionnaire changes. Thus, the 2014 and prior year estimates are shown with the "nc" notation.

The "nr = not reported due to measurement issues" portion of the footnote indicates that the estimate could be calculated based on available data but is not calculated due to potential measurement issues. For example, lifetime use of prescription pain relievers for 2015 and 2016 is shown as "nr" because the questionnaire was changed to focus on past year misuse of pain relievers rather than lifetime past year use of pain relievers, and there appears to be an underestimate of lifetime pain reliever use compared with prior years.

For more information on how low precision is defined and further details on the changes noted above, see Section B.2.2 in Section B and Section C of the *2016 National Survey on Drug Use and Health: Methodological Summary and Definitions*.¹⁵

Additionally, all type A and B detailed tables where significance testing was performed between years contain the following footnotes, regardless of whether any differences were significant:

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹⁵ See the reference in footnote 2.

Tables where significance testing was not performed between years, such as those with only a single year or single group of combined years or those with no comparable estimates for years prior to 2016, do not contain these footnotes.

Missingness

Some measures are not defined for all respondents and have missing data. In the detailed tables, a footnote or note is included to alert a user to the fact that missing data were excluded from the analysis. For the 2016 NSDUH, an investigation was completed to look at missing data rates in the 2016 detailed tables. The investigation was done for all new 2016 measures and existing measures where there was a break in a trend. For other measures, the results from the 2014 and 2015 investigations were assumed to still hold. That is, missing data were not a concern for most topics. Similar results were found in 2016. However, a few items did have a slightly higher rate of missing data (e.g., items on perceived availability of various illicit drugs and items on the source of prescription drugs obtained for most recent use). Specifically, less than 5 percent of the risk, availability, and protective factor subpopulations evaluated in 2016 had both weighted and unweighted missingness rates above 5 percent. The highest weighted rate of numerator missingness was 7.8 percent. These percentages were similar to the results for the risk, availability, and protective factor measures from the 2015 investigation. The exclusion of respondents with missing data induces a negative bias for estimates of population totals and may induce a bias in either direction for estimates of population means and proportions. For more information, see Chapter 4 of the 2015 NSDUH statistical inference report.¹⁶

Rounding and Effect on Significance Testing

Prevalence estimates in the form of percentages are presented rounded to the nearest tenth of a percent, and total estimates are rounded to the nearest thousand. Due to this rounding, prevalence estimates of 0.0 percent and total estimates of 0 are displayed in the tables. These estimates are rounded down from a percentage < 0.05 percent or < 50 , respectively, and do not represent an absence of persons displaying a particular characteristic. Nonrounded estimates of zero are suppressed.

Testing between two prevalence estimates can indicate significant differences involving estimates that appear identical when rounded but are actually different. Note that similar results can be seen in the average age-at-first-use estimates and the estimates for the average number of days used, which are also rounded to the nearest tenth, and the total estimates. For example, in [Table 1.14B](#), the estimate for past month heroin use among females aged 12 or older was 0.1 percent for both 2015 and 2016 and was indicated as significantly different. Although the rounded estimates appear the same, the unrounded estimates were 0.066 percent for 2015 and 0.129 percent for 2016. Another example in [Table 7.3B](#), a trend table in the 2016 detailed tables, shows how seemingly identical estimates from previous years can differ in significance when each is compared against the current year estimate. The estimate for past month crack use among people aged 12 or older was 0.1 percent for 2008, 2010, 2011, 2013, 2014, and 2015, but only the 2011 estimate was significantly different from the 2016 estimate of 0.2 percent. Although the rounded estimates for 2008, 2010, 2011, 2013, 2014, and 2015 appeared to be the same, the

¹⁶ See reference in footnote 4.

unrounded estimates were 0.145 percent for 2008, 0.149 percent for 2010, 0.089 percent for 2011, 0.144 percent for 2013, 0.134 percent for 2014, and 0.147 percent for 2015; moreover, each of these estimates had varying standard errors that affected the testing. Note that differences in precision can also cause seemingly identical (or identical) previous year estimates to differ in significance when compared with the current year estimate.

Definitions of Totals

Totals are defined in different ways within the detailed tables. Totals can refer to the estimated number of persons with a specific characteristic, as shown in detailed table type A and displayed in number of thousands. For example, in [Table 2.2](#), the total estimated population of persons aged 12 to 17 who used cigarettes in the past year in 2016 was approximately 1,785,000 and shown as 1,785. Totals can also be presented in the table rows or columns, either as a total of a subgroup category or listed as the "Total Population." If the estimate is a total of a subgroup category (e.g., total of gender), the estimate is the total number of both males and females combined. Instances where measures have missing data may cause the subcategories to not add up to a total and are noted in the tables. If the estimate is shown as the "Total Population" on the row, then that estimate is usually included as a reference for tables with a nonstandard denominator. This total population estimate is normally the number being used in the nonstandard denominator to allow users to easily see that estimate without having to switch tables. For example, in [Table 8.53](#), the total population row for table type A shows the estimated number of persons who fit the criteria in the columns, which are the table denominators (i.e., 11,769,000 adults reported a perceived unmet need for mental health services in the past year for 2016), and this number is used as the denominator in all the reason estimates.

LOCATING A TABLE

The detailed tables consist of prevalence estimates (table types A and B), standard errors and *p* values (table types C, D, and P), and sample sizes (table type N). The tables (all types) are organized by subject matter sections. A total of 12 subject matter sections are available for 2016, and a pair of methods can be used to locate and access a table of interest within the PDF version of the detailed tables.

Subject Matter Sections

If a user knows which of the 12 subject matter sections is of interest, then he or she can click directly on the bookmark for that subject matter section. This will take the user to the index of tables for that section. This index can be used to identify the group of tables in which the desired table is likely to be located. Clicking on the appropriate link will take the user directly to the first table in the specified group where he or she then can scroll through the tables to locate the table of interest. The group links will provide the user access to the prevalence estimate tables. To access the corresponding standard error and *p* value tables, a user must click on the "SE" link associated with that group link.

Note that the table numbers and sections differ from previous years. The 2014 mental health detailed tables contained three sections. Section 1 of the 2014 mental health detailed tables is now equivalent to Sections 8 and 10 of the 2015 and 2016 detailed tables; 2014's

Section 2 is equivalent to Sections 9 and 11 of the 2015 and 2016 detailed tables; and 2014's Section 3 (the sample size and population tables) is now included in Section 12 of the 2015 and 2016 detailed tables.

The 12 subject matter sections are as follows:

Index of Section 1: Illicit Drug Use Tables (1.1 to 1.116)

Index of Section 2: Tobacco Product and Alcohol Use Tables (2.1 to 2.57)

Index of Section 3: Risk and Protective Factor Tables (3.1 to 3.33)

Index of Section 4: Incidence Tables (4.1 to 4.13)

Index of Section 5: Substance Use Disorder and Treatment Tables (5.1 to 5.54)

Index of Section 6: Miscellaneous Tables (6.1 to 6.90)

Index of Section 7: Trend Tables (7.1 to 7.40)

Index of Section 8: Adult Mental Health Tables (8.1 to 8.85)

Index of Section 9: Youth Mental Health Tables (9.1 to 9.15)

Index of Section 10: Adult Mental Health Trend Tables (10.1 to 10.41)

Index of Section 11: Youth Mental Health Trend Tables (11.1 to 11.6)

Index of Section 12: Sample Size and Population Tables (12.1 to 12.9)

Reference Tools

If a user needs more detailed information on which subject matter section to enter, he or she can click on the "Reference Tools" bookmark to learn about various other tools available for locating a specific table of interest. These tools include a key to selected variables and a list of tables. For information on key definitions (i.e., the glossary) for many of the measures and terms used in the detailed tables, see Section D of the 2016 methodological summary and definitions report.¹⁷

The key to selected variables defines key topics (e.g., demographics) used throughout the 2016 detailed tables. As mentioned earlier, the glossary defines and cross-references many key measures used in the 2016 detailed tables and the 2016 FFRs. Both the key and the glossary may be helpful when used in conjunction with the table index in identifying tables that contain information for selected measures. However, not all measures and terms listed in the key and the glossary are specifically mentioned in the table index. The list of tables can be used to identify a specific table for one of the subject matter sections. Once the desired table has been located using the reference tools, the user then should follow the directions provided earlier in the section on the "Subject Matter Sections" to access the table.

Note that once a group of prevalence estimate tables is accessed, there is no direct link to the corresponding standard error and *p* value tables (and vice versa). If the user wishes to see the corresponding prevalence estimate, standard error and *p* value, or sample size and population

¹⁷ See the reference in footnote 2.

tables, it will be necessary first to click on the appropriate subject matter bookmark, then to select the new group that contains the table of interest.

Index of Section 1 Tables: Illicit Drug Use (1.1 to 1.116)

Illicit Drug Use Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Lifetime, past year, and past month illicit drug use, by selected age categories and gender	1.1 to 1.14	SE	Yes
Selected illicit drugs, by detailed age categories	1.15 to 1.27	SE	Yes
Any use/misuse of prescription psychotherapeutics, by selected age categories	1.28	SE	Yes
Selected illicit drugs, by demographic characteristics	1.29 to 1.66		
Illicit drugs	1.29 to 1.31	SE	Yes
Marijuana	1.32 to 1.34	SE	Yes
Cocaine	1.35 to 1.37	SE	Yes
Crack	1.38 to 1.40	SE	Yes
Hallucinogens	1.41 to 1.43	SE	Yes
Inhalants	1.44 to 1.46	SE	Yes
Methamphetamines	1.47 to 1.49	SE	Yes
Any use/misuse of prescription psychotherapeutics	1.50 to 1.52	SE	Yes
Any use/misuse of pain relievers	1.53 to 1.55	SE	Yes
Any use/misuse of tranquilizers	1.56 to 1.58	SE	Yes
Any use/misuse of stimulants	1.59 to 1.61	SE	Yes
Any use/misuse of sedatives	1.62 to 1.64	SE	Yes
Misuse of opioids	1.65 and 1.66	SE	Yes
Selected illicit drugs, by geographic and socioeconomic characteristics	1.67 to 1.95		
Illicit drugs	1.67 and 1.68	SE	Yes
Marijuana	1.69 and 1.70	SE	Yes
Cocaine	1.71 and 1.72	SE	Yes
Crack	1.73	SE	Yes
Hallucinogens	1.74	SE	Yes
Inhalants	1.75 and 1.76	SE	Yes
Methamphetamines	1.77 and 1.78	SE	Yes
Any use/misuse of prescription psychotherapeutics	1.79 to 1.81	SE	Yes
Any use/misuse of pain relievers	1.82 to 1.84	SE	Yes
Any use/misuse of tranquilizers	1.85 to 1.87	SE	Yes
Any use/misuse of stimulants	1.88 to 1.90	SE	Yes
Any use/misuse of sedatives	1.91 to 1.93	SE	Yes
Misuse of opioids	1.94 and 1.95	SE	Yes
Specific lifetime hallucinogen, inhalant, needle, heroin, and other drug use, by selected age categories	1.96	SE	Yes

See note at end of table.

(continued)

Index of Section 1 Tables: Illicit Drug Use (1.1 to 1.116) (continued)

Illicit Drug Use Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Prescription psychotherapeutic subtypes, by selected age categories	1.97 to 1.116		
Any use/misuse of pain relievers	1.97 to 1.101	SE	Yes
Any use/misuse of tranquilizers	1.102 to 1.106	SE	Yes
Any use/misuse of stimulants	1.107 to 1.111	SE	Yes
Any use/misuse of sedatives	1.112 to 1.116	SE	Yes

¹"Yes" indicates that at least one estimate from the table(s) in Section 1 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates. Note that the matching estimate(s) may be from a total row or column, and there is not necessarily a one-to-one corresponding trend table.

Index of Section 2 Tables: Tobacco Product and Alcohol Use (2.1 to 2.57)

Tobacco Product and Alcohol Use Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Lifetime, past year, and past month tobacco product and alcohol use, by selected age categories and gender	2.1 to 2.14	SE	Yes
Selected tobacco product and alcohol use, by detailed age categories	2.15 to 2.20	SE	Yes
Selected tobacco product and alcohol use, by demographic characteristics	2.21 to 2.37		
Tobacco products	2.21 to 2.23	SE	Yes
Cigarettes	2.24 to 2.26	SE	Yes
Smokeless tobacco	2.27 to 2.29	SE	Yes
Cigars	2.30 to 2.32	SE	Yes
Alcohol	2.33 to 2.37	SE	Yes
Selected tobacco product and alcohol use, by geographic and socioeconomic characteristics	2.38 to 2.49		
Tobacco products	2.38 and 2.39	SE	Yes
Cigarettes	2.40 and 2.41	SE	Yes
Smokeless tobacco	2.42 and 2.43	SE	Yes
Cigars	2.44 and 2.45	SE	Yes
Alcohol	2.46 to 2.49	SE	Yes
Underage and legal drinkers' alcohol use, by demographic characteristics	2.50 to 2.53	SE	Yes
Underage and legal drinkers' alcohol use, by geographic and socioeconomic characteristics	2.54 to 2.57	SE	Yes

¹ "Yes" indicates that at least one estimate from the table(s) in Section 2 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates. Note that the matching estimate(s) may be from a total row or column, and there is not necessarily a one-to-one corresponding trend table.

Index of Section 3 Tables: Risk and Protective Factors (3.1 to 3.33)

Risk and Protective Factor Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7 ¹
Perceived risk and availability of substances	3.1 to 3.8		
Perceived risk and availability, by selected age categories	3.1 and 3.2	SE	No
Perceived risk and availability, by specific substance use initiation	3.3	SE	No
Perceived risk, by demographic and geographic characteristics	3.4 to 3.7	SE	No
Perceived availability, by demographic and geographic characteristics	3.8	SE	No
Risk and protective factors, by demographic and geographic characteristics	3.9 to 3.21		
Disapproval of substance use behavior	3.9 to 3.11	SE	Yes
Prevention programs/messages	3.12 and 3.13	SE	Yes
Delinquent behavior	3.14 and 3.15	SE	No
Youth behaviors	3.16	SE	No
Religious beliefs	3.17	SE	No
Parental involvement in specific behaviors	3.18	SE	No
Student characteristics	3.19	SE	Yes
Adult involvement in specific school-related behaviors	3.20	SE	No
Substance use of students in grade level	3.21	SE	No
Past month substance use and risk and protective factors	3.22 to 3.33		
Substance use, by perceived risk and availability of substances	3.22 and 3.23	SE	No
Perceived availability, by substance use	3.24 to 3.28	SE	No
Substance use, by disapproval of substance use behavior	3.29 and 3.30	SE	No
Substance use, by prevention programs/messages and delinquent behavior	3.31	SE	No
Substance use, by selected youth behavior, religious beliefs, and parental involvement in specific behaviors	3.32	SE	No
Substance use, by student characteristics, adult involvement in specific school-related behaviors, and substance use of students in grade level	3.33	SE	No

¹ "Yes" indicates that at least one estimate from the table(s) in Section 3 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates. Note that the matching estimate(s) may be from a total row or column, and there is not necessarily a one-to-one corresponding trend table.

Index of Section 4 Tables: Incidence (4.1 to 4.13)

Incidence Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Past year initiation of substance use	4.1 to 4.13		
Initiation of selected substances among persons aged 12 or older, persons at risk for initiation, and past year users, by selected age categories and gender	4.1 to 4.3	SE	Yes
Initiation among selected age categories, persons at risk for initiation, ² and past year users	4.4 to 4.8	SE	Yes
Initiation among persons aged 12 or older, by gender	4.9	SE	Yes
Initiation among persons aged 12 or older who initiated use prior to a selected age, by gender	4.10 and 4.11	SE	No
Initiation among persons aged 12 to 49, by gender	4.12	SE	No
Mean age at first substance use among past year initiates aged 12 to 49, by gender	4.13	SE	Yes

¹ "Yes" indicates that at least one estimate from the table(s) in Section 4 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates. Note that the matching estimate(s) may be from a total row or column, and there is not necessarily a one-to-one corresponding trend table.

² Due to measurement issues, At Risk for Initiation is not estimated for misuse of prescription drugs. See Section B of the following reference: Center for Behavioral Health Statistics and Quality. (2017). *2016 National Survey on Drug Use and Health: Methodological summary and definitions*. Retrieved from <https://www.samhsa.gov/data/>

Index of Section 5 Tables: Substance Use Disorder and Treatment (5.1 to 5.54)

Substance Use Disorder and Treatment Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Substance use disorder	5.1 to 5.9	SE	Yes
Received substance use treatment	5.10 to 5.20		
Treatment, by detailed age categories and demographic, geographic, and socioeconomic characteristics	5.10 to 5.15	SE	No
Type of treatment	5.16	SE	
Specific substance for last or current treatment	5.17	SE	No
Location of treatment	5.18 to 5.20	SE	No
Received substance use treatment at a specialty facility	5.21 to 5.35		
Treatment, by detailed age categories and demographic, geographic, and socioeconomic characteristics	5.21 to 5.26	SE	No
Type of treatment	5.27	SE	No
Specific substance for last or current treatment	5.28	SE	No
Location of treatment	5.29 to 5.31	SE	No
Source of payment for last or current treatment	5.32 to 5.34	SE	No
Treatment, by substance use disorder	5.35	SE	No
Received substance use treatment at any location or a specialty facility	5.36 to 5.41		
Type of treatment	5.36	SE	No
Type of treatment at specialty/nonspecialty facility	5.37 to 5.40	SE	No
Treatment, by substance use disorder	5.41	SE	No
Needed and received treatment or perceived need for treatment and made effort to get treatment	5.42 to 5.54		
Illicit drug	5.42 to 5.46	SE	No
Alcohol	5.47 to 5.49	SE	No
Substance (illicit drug or alcohol)	5.50 to 5.52	SE	No
Reasons for not receiving substance use treatment	5.53 and 5.54	SE	No

¹ "Yes" indicates that at least one estimate from the table(s) in Section 5 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates. Note that the matching estimate(s) may be from a total row or column, and there is not necessarily a one-to-one corresponding trend table.

Index of Section 6 Tables: Miscellaneous (6.1 to 6.90)

Miscellaneous Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Frequency of use/misuse and average number of days used	6.1 to 6.8	SE	Yes
Prescription psychotherapeutic any use/misuse, by substance use	6.9 to 6.13	SE	No
Illicit drugs, by cigarette use	6.14 to 6.18	SE	No
Illicit drugs, by alcohol use	6.19 to 6.23	SE	No
Illicit drugs among alcohol users	6.24	SE	No
Drugs used with or within 2 hours of alcohol use	6.25	SE	No
Illicit drugs, by cigarette and alcohol use	6.26 to 6.31	SE	No
Tobacco product and alcohol, by cigarette use	6.32 to 6.36	SE	No
Tobacco product, by alcohol use	6.37 to 6.41	SE	No
Illicit drugs or alcohol, by demographic characteristics	6.42	SE	No
Opioid use disorder and opioid misuse	6.43 and 6.44	SE	Yes
Prior year and past year marijuana use status, by selected age categories and gender	6.45	SE	No
Nicotine (cigarette) dependence	6.46 to 6.50	SE	Yes
Substance use disorder, by age at first use and demographic characteristics	6.51 and 6.52	SE	Yes
Source for most recent prescription psychotherapeutic misuse (pain relievers, tranquilizers, stimulants, and sedatives)	6.53 to 6.60	SE	No
Reasons for prescription psychotherapeutic drug misuse	6.61 and 6.62	SE	No
Social context, location, and source of underage drinking	6.63 and 6.64	SE	Yes
Pregnancy	6.65 to 6.69	SE	No
College enrollment	6.70 to 6.83	SE	No
Driving under the influence	6.84 and 6.85	SE	No
Probation and parole/supervised release	6.86 to 6.90	SE	Yes

¹ "Yes" indicates that at least one estimate from the table(s) in Section 6 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates. Note that the matching estimate(s) may be from a total row or column, and there is not necessarily a one-to-one corresponding trend table.

Index of Section 7 Tables: Trends (7.1 to 7.40)

Substance Use Trend Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding 2-Year Table(s) Available in Sections 1-6¹
Multiyear trends	7.1 to 7.40		
Substance use	7.1 to 7.25		
Lifetime, past year, and past month illicit drug use, by selected age categories	7.1 to 7.15	SE	Yes
Past month tobacco product and alcohol use, by selected age categories and gender	7.16 to 7.20	SE	Yes
Daily marijuana use and average number of days used, by selected age categories	7.21	SE	Yes
Daily cocaine use and average number of days used, by selected age categories	7.22	SE	Yes
Daily cigarette use and smoked one or more packs a day, by selected age categories	7.23	SE	Yes
Daily alcohol use and average number of days used, by selected age categories	7.24	SE	Yes
Lifetime, past year, and past month alcohol use, by underage drinkers and gender	7.25	SE	Yes
Risk and protective factors	7.26 and 7.27		
Disapproval of substance use behavior among persons aged 12 to 17	7.26	SE	Yes
Prevention programs/messages among persons aged 12 to 17	7.27	SE	Yes
Past year initiation of substance use	7.28 to 7.33		
Initiation among selected age categories	7.28 to 7.32	SE	Yes
Mean age at first substance use among past year initiates aged 12 to 49	7.33	SE	Yes
Substance use disorder among selected age categories	7.34 to 7.38	SE	Yes
1971-2016 past month marijuana and past year cocaine use, by selected age categories	7.39 and 7.40	SE	Yes

NOTE: Estimates for 2002-2016 are presented in these tables unless otherwise noted above.

¹ "Yes" indicates that at least one estimate from the table(s) in Section 7 is also found in Sections 1 through 6, but the Section 1 to 6 table(s) may not include all of the estimates.

Index of Section 8 Tables: Adult Mental Health (8.1 to 8.85)

Adult Mental Health Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 10 ¹
Mental illness	8.1 to 8.32		
Any mental illness (AMI), by detailed age categories and demographic, geographic, and socioeconomic characteristics	8.1 to 8.3	SE	Yes
Serious mental illness (SMI), by detailed age categories and demographic, geographic, and socioeconomic characteristics	8.4 to 8.6	SE	Yes
Levels of mental illness, by demographic, geographic, and socioeconomic characteristics	8.7 and 8.8	SE	Yes
Illicit drug use, by level of mental illness	8.9	SE	No
Prescription psychotherapeutic drug use/misuse, by level of mental illness, major depressive episode (MDE), and suicidal behavior	8.10 to 8.19	SE	No
Tobacco and alcohol use, by level of mental illness	8.20	SE	No
Levels of mental illness with substance use disorder (SUD)	8.21 to 8.24	SE	Yes
Co-occurring SUD and AMI, by demographic, geographic, and socioeconomic characteristics	8.25 and 8.26	SE	No
Co-occurring SUD and SMI, by demographic, geographic, and socioeconomic characteristics	8.27 and 8.28	SE	No
Co-occurring SUD and AMI excluding SMI, by demographic, geographic, and socioeconomic characteristics	8.29 and 8.30	SE	No
AMI and SMI, by probation or parole/supervised release and demographic characteristics	8.31 and 8.32	SE	Yes
Mental health services	8.33 to 8.55		
Mental health services, by level of mental illness and demographic, geographic, and socioeconomic characteristics	8.33 to 8.37	SE	Yes
Substance use treatment at a specialty facility and/or mental health services, by AMI, SMI, and selected age categories	8.38	SE	No
Types of mental health services, by level of mental illness	8.39 and 8.40	SE	Yes
Location of mental health services, by level of mental illness	8.41	SE	Yes
Types and locations of mental health services, by level of mental illness	8.42	SE	Yes
Substance use treatment at a specialty facility and/or mental health services, by SUD and level of mental illness	8.43	SE	No
Types of mental health services, by selected age categories	8.44	SE	Yes

See notes at end of table.

(continued)

Index of Section 8 Tables: Adult Mental Health (8.1 to 8.85) (continued)

Adult Mental Health Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 10¹
Location of outpatient mental health services, by selected age categories	8.45	SE	Yes
Sources of payment for outpatient mental health services, by selected age categories	8.46	SE	No
Perceived unmet need for mental health services, by receipt of services and demographic, geographic, and socioeconomic characteristics	8.47 to 8.52	SE	Yes
Reasons for not receiving mental health services, by receipt of treatment	8.53 to 8.55	SE	Yes
Major depressive episode (MDE)	8.56 to 8.65		
MDE and receipt of treatment for depression, by detailed age categories and demographic, geographic, socioeconomic, and health characteristics	8.56 to 8.59	SE	Yes
Substance use, by MDE	8.60	SE	No
SUD, by level of mental illness, MDE, and suicidal behavior	8.61	SE	Yes
Type of professional seen	8.62 and 8.63	SE	No
Type of treatment received for depression, by demographic and socioeconomic characteristics	8.64	SE	No
Substance use treatment at a specialty facility and/or mental health services, by SUD and MDE	8.65	SE	No
Suicide	8.66 to 8.83		
Suicidal behavior and treatment, by detailed age categories and demographic, geographic, and socioeconomic characteristics	8.66 to 8.75	SE	Yes
Suicidal behavior, by substance use	8.76	SE	Yes
Serious thoughts of suicide, by probation or parole/supervised release status	8.77 and 8.78	SE	Yes
Suicidal behavior and treatment, level of mental illness, MDE, and mental health services, by college enrollment	8.79 to 8.81	SE	No
Suicidal behavior with mental health and substance use measures	8.82 and 8.83	SE	No
Serious psychological distress (SPD)	8.84 and 8.85		
Past month SPD, by detailed age categories and demographic and socioeconomic characteristics	8.84 and 8.85	SE	Yes

¹ "Yes" indicates that at least one estimate from the table(s) in Section 8 is also found in Section 10, but the Section 10 table(s) may not include all of the estimates. Note that the matching estimate(s) may be from a total row or column, and there is not necessarily a one-to-one corresponding trend table.

Index of Section 9 Tables: Youth Mental Health (9.1 to 9.15)

Youth Mental Health Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 11 ¹
Mental health services	9.1 to 9.5		
Source of services, by demographic, geographic, and socioeconomic characteristics	9.1 to 9.3	SE	Yes
Reasons for receiving most recent services	9.4	SE	Yes
Number of visits or overnight stays	9.5	SE	No
Major depressive episode (MDE)	9.6 to 9.15		
MDE and receipt of treatment for depression, by detailed age categories and demographic, geographic, socioeconomic, and health characteristics	9.6 to 9.8	SE	Yes
Substance use, by MDE	9.9	SE	No
MDE, by substance use disorder (SUD) and demographic characteristics	9.10	SE	No
SUD, by MDE and demographic characteristics	9.11	SE	No
Co-occurring SUD and MDE, by demographic characteristics	9.12	SE	No
Type of professional seen	9.13	SE	No
Type of treatment received for depression, by demographic and socioeconomic characteristics	9.14	SE	Yes
Substance use treatment at a specialty facility and/or mental health services, by SUD, MDE, and selected age categories	9.15	SE	No

¹ "Yes" indicates that at least one estimate from the table(s) in Section 9 is also found in Section 11, but the Section 11 table(s) may not include all of the estimates. Note that the matching estimate(s) may be from a total row or column, and there is not necessarily a one-to-one corresponding trend table.

Index of Section 10 Tables: Adult Mental Health Trends (10.1 to 10.41)

Adult Mental Health Trend Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding 2-Year Table(s) Available in Section 8¹
Multiyear trends	10.1 to 10.41		
2008-2016 mental illness	10.1 to 10.5		
Any mental illness (AMI), by demographic, geographic, and socioeconomic characteristics	10.1 and 10.2	SE	Yes
Serious mental illness (SMI), by demographic, geographic, and socioeconomic characteristics	10.3 and 10.4	SE	Yes
AMI excluding SMI, by demographic characteristics	10.5	SE	Yes
Mental health services	10.6 to 10.29		
2002-2016 mental health services, by demographic, geographic, and socioeconomic characteristics	10.6 and 10.7	SE	Yes
2008-2016 mental health services with levels of mental illness, by demographic, geographic, and socioeconomic characteristics	10.8 to 10.14	SE	Yes
2008-2016 prescription medication as type of mental health service, by AMI, SMI, and selected age categories	10.15	SE	Yes
2002-2016 types of mental health services, by selected age categories	10.16	SE	Yes
2008-2016 types of mental health services with AMI or SMI, by selected age categories	10.17 and 10.18	SE	Yes
2002-2016 location of outpatient mental health services	10.19	SE	Yes
2008-2016 location of outpatient mental health services with AMI or SMI	10.20 and 10.21	SE	Yes
2002-2016 number of mental health services, by selected age categories	10.22	SE	Yes
2008-2016 number of mental health services with AMI or SMI, by selected age categories	10.23 and 10.24	SE	Yes
2002-2016 perceived unmet need for mental health services, by demographic characteristics	10.25	SE	Yes
2008-2016 perceived unmet need for mental health services, by AMI, SMI, and selected age categories	10.26	SE	Yes

See notes at end of table.

(continued)

Index of Section 10 Tables: Adult Mental Health Trends (10.1 to 10.41) (continued)

Adult Mental Health Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding 2-Year Table(s) Available in Section 8¹
2002-2016 mental health services with perceived unmet need, by selected age categories	10.27	SE	No
2008-2016 mental health services with levels of mental illness and perceived unmet need, by selected age categories	10.28 and 10.29	SE	No
Major depressive episode (MDE)	10.30 to 10.32		
2005-2016 MDE, by demographic characteristics	10.30	SE	Yes
2009-2016 MDE and receipt of treatment for depression, by demographic characteristics	10.31 and 10.32	SE	Yes
Suicidal behavior	10.33 to 10.39		
2008-2016 suicidal behavior, by detailed age categories and demographic, geographic, and socioeconomic characteristics	10.33 to 10.39	SE	Yes
Serious psychological distress (SPD)	10.40 and 10.41		
2008-2016 past month SPD, by demographic characteristics	10.40	SE	Yes
2005-2016 past year SPD, by demographic characteristics	10.41	SE	No

¹ "Yes" indicates that at least one estimate from the table(s) in Section 10 is also found in Section 8, but the Section 8 table(s) may not include all of the estimates.

Index of Section 11 Tables: Youth Mental Health Trends (11.1 to 11.6)

Youth Mental Health Trend Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding 2-Year Table(s) Available in Section 9 ¹
Multiyear trends	11.1 to 11.6		
2002-2016 sources of mental health services	11.1	SE	Yes
2004-2016 major depressive episode (MDE), by demographic characteristics	11.2	SE	Yes
2004-2016 receipt of treatment for depression with MDE, by demographic characteristics	11.3	SE	Yes
2004-2016 type of treatment received for depression with MDE	11.4	SE	Yes
2006-2016 MDE with severe impairment, by demographic characteristics	11.5	SE	Yes
2006-2016 receipt of treatment for depression with MDE with severe impairment, by demographic characteristics	11.6	SE	Yes

¹ "Yes" indicates that at least one estimate from the table(s) in Section 11 is also found in Section 9, but the Section 9 table(s) may not include all of the estimates.

Index of Section 12 Tables: Sample Size and Population Estimates (12.1 to 12.9)

Sample Size and Population Table	Table Number	Link to Corresponding Standard Error (SE) Table
Detailed age categories and demographic characteristics	12.1 to 12.3	SE
Geographic, socioeconomic, and health characteristics	12.4 and 12.5	SE
Selected age categories and gender (2002-2016)	12.6	SE
Pregnancy	12.7	SE
College enrollment	12.8	SE
Probation and parole/supervised release	12.9	SE

Reference Tools

To assist a user in locating a specific table of interest within the *Results from the 2016 National Survey on Drug Use and Health: Detailed Tables*, reference tools have been developed. Note that the following tools are provided solely for guidance when examining the 2016 detailed tables because there are no hyperlinks within these tools that lead directly to the detailed tables:

- a key to selected variables;
- Key Definitions for the 2016 National Survey on Drug Use and Health (i.e., the glossary);
- List of Tables: Prevalence Estimates and Sample Sizes - Table Types A, B, and N; and
- List of Tables: Standard Errors and *P* Values - Table Types C, D, and P.

Hyperlinks that lead directly to the tables can be found under the "Tables" bookmark. How to locate a table by selecting the "Tables" bookmark is explained in the "Locating a Table" section of the introduction.

Using the Key to Selected Variables. The key to selected variables defines key demographic, geographic, and socioeconomic and health characteristics used throughout the 2016 detailed tables. For example, a user interested in information about the prevalence of illicit drug use by level of education can first review the key to selected variables and see that education is categorized as a demographic characteristic. Next, a user can determine, by looking at the bookmarks for the subject matter sections, that tables pertaining to illicit drug use can be found in Section 1: Illicit Drug Use Tables. By selecting this bookmark, the user will be taken to the table index for the illicit drug use tables. Now the user can scan the links to learn that data on the prevalence of illicit drug use by demographic characteristics are located in the group of tables numbered 1.29 to 1.31. Selecting the link to the left of the table numbers will take the user directly to the first table in the specified group.

Using the Key Definitions for the 2016 National Survey on Drug Use and Health. The glossary defines and cross-references commonly used measures and terms in the 2016 detailed tables and the 2016 first findings reports.¹ For example, a user interested in information about the prevalence of alcohol use measures by demographic characteristics can first review the alcohol use entry in the glossary to see a cross-reference of additional selected alcohol use measures included in the tables and reports from the 2016 National Survey on Drug Use and Health. After reviewing the definitions for the various measures, the user can select measures of interest (e.g., "binge use of alcohol"). Next, a user can determine, by looking at the bookmarks for the subject matter sections, that tables pertaining to alcohol use can be found in Section 2: Tobacco Product and Alcohol Use Tables. By selecting this bookmark, the user will be taken to the table index for tobacco product and alcohol use tables. Now the user can scan the links to

¹ The glossary is available online as Section D of the following report: Center for Behavioral Health Statistics and Quality. (2017). *2016 National Survey on Drug Use and Health: Methodological summary and definitions*. Retrieved from <https://www.samhsa.gov/data/>

learn that data on the prevalence of alcohol use by demographics are located in the group of tables numbered 2.33 to 2.37. Selecting the link to the left of the table numbers will take the user directly to the first table in the specified group where the user can scroll through the tables to locate the table(s) pertaining to the prevalence of "binge use of alcohol" by demographic characteristics (Table 2.36).

Using the List of Tables. The list of tables for both prevalence estimates and sample sizes (table types A, B, and N) and standard errors and p values (table types C, D, and P) can be used to identify a specific table for one of the subject matter sections. For example, a user interested in information about the prevalence of past month illicit drug use among youths aged 12 or 13 can review the list of tables in Section 1: Illicit Drug Use Tables and identify Table 1.3B as the table of interest.

Key to Selected Variables

The following key defines selected demographic, geographic, and socioeconomic and health characteristic variables used throughout the *Results from the 2016 National Survey on Drug Use and Health: Detailed Tables*. This key may be helpful when used in conjunction with the index of tables in identifying tables that contain information for these selected characteristics. However, not all variables listed below are specifically mentioned in the index of tables.¹

Demographic Characteristics

Standard Age Categories: 12 or Older, 12-17, 18 or Older, 18-25, 26 or Older, 26-49, 50 or Older

Detailed Age Categories: 12 or Older, 12, 13, 12-13, 12-14, 12-17, 14, 14-15, 15, 15-17, 16, 16-17, 17, 18, 18 or Older, 18-20, 18-25, 19, 20, 21, 21-25, 22, 23, 24, 25, 26 or Older, 26-29, 26-34, 26-44, 26-49, 30-34, 35 or Older, 35-39, 35-49, 40-44, 45-49, 50 or Older, 50-54, 55-59, 60-64, 65 or Older

Underage/Legal Drinking Age Categories: 12-20, 21 or Older

Driving Under the Influence Age Categories: 16 or Older, 16-20, 16-25, 21-25, 26 or Older

Gender: Male, Female

Hispanic Origin and Race: Not Hispanic or Latino White, Not Hispanic or Latino Black or African American, Not Hispanic or Latino American Indian or Alaska Native, Not Hispanic or Latino Native Hawaiian or Other Pacific Islander, Not Hispanic or Latino Asian, Not Hispanic or Latino Two or More Races, Hispanic or Latino, Not Hispanic or Latino

Gender/Race/Hispanic Origin: Male White Not Hispanic, Female White Not Hispanic, Male Black Not Hispanic, Female Black Not Hispanic, Male Hispanic, Female Hispanic

Education: Less Than High School, High School Graduate, Some College or Associate's Degree, College Graduate (Note: This variable is defined for adults aged 18 or older.)

Current Employment: Full-Time, Part-Time, Unemployed, Other (including students, persons keeping house or caring for children full time, retired or disabled persons,

¹ Definitions for many of the measures and terms used in the detailed tables and reports from the 2016 National Survey on Drug Use and Health (NSDUH) are available online in Section D of the following report: Center for Behavioral Health Statistics and Quality. (2017). *2016 National Survey on Drug Use and Health: Methodological summary and definitions*. Retrieved from <https://www.samhsa.gov/data/>

or other persons not in the labor force)
(Note: This variable is defined for adults aged 18 or older.)

Family Income: Less Than \$20,000; \$20,000-\$49,999; \$50,000-\$74,999; \$75,000 or More

Geographic Characteristics

Region: Northeast, Midwest, South, West

County Type:² Large Metro counties; Small Metro counties; Nonmetro, including urbanized counties, less urbanized counties, or completely rural counties

Socioeconomic and Health Characteristics

Poverty Level: Three categories for poverty level are defined relative to the poverty threshold: less than 100 percent, 100 to 199 percent, 200 percent or more

Health Insurance: Private Health Insurance, Medicaid/Children's Health Insurance Program (CHIP) Other (including Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or other type), No Coverage

Overall Health: Excellent, Very Good, Good, Fair/Poor

² The county type measures used in the 2016 detailed tables were defined using the 2013 Rural-Urban Continuum Codes, which differ from the Rural-Urban Continuum Codes that were used to define county type in NSDUHs prior to 2015 due to the use of different census data and changes to the statistical area definition. Therefore, the county type estimates presented in the 2015 and 2016 detailed tables are not comparable with county type estimates presented in prior detailed tables. More details about county type are available online in Section B.4.5 of the following report: Center for Behavioral Health Statistics and Quality. (2017). *2016 National Survey on Drug Use and Health: Methodological summary and definitions*. Retrieved from <https://www.samhsa.gov/data/>

LIST OF TABLES

Table

- 1.1A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older: Numbers in Thousands, 2015 and 2016
- 1.1B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older: Percentages, 2015 and 2016
- 1.2A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17: Numbers in Thousands, 2015 and 2016
- 1.2B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17: Percentages, 2015 and 2016
- 1.3A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or 13: Numbers in Thousands, 2015 and 2016
- 1.3B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or 13: Percentages, 2015 and 2016
- 1.4A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 14 or 15: Numbers in Thousands, 2015 and 2016
- 1.4B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 14 or 15: Percentages, 2015 and 2016
- 1.5A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 16 or 17: Numbers in Thousands, 2015 and 2016
- 1.5B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 16 or 17: Percentages, 2015 and 2016
- 1.6A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older: Numbers in Thousands, 2015 and 2016
- 1.6B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older: Percentages, 2015 and 2016
- 1.7A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25: Numbers in Thousands, 2015 and 2016
- 1.7B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25: Percentages, 2015 and 2016
- 1.8A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 20: Numbers in Thousands, 2015 and 2016
- 1.8B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 20: Percentages, 2015 and 2016
- 1.9A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 21 to 25: Numbers in Thousands, 2015 and 2016
- 1.9B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 21 to 25: Percentages, 2015 and 2016
- 1.10A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 or Older: Numbers in Thousands, 2015 and 2016
- 1.10B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 or Older: Percentages, 2015 and 2016
- 1.11A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 to 34: Numbers in Thousands, 2015 and 2016
- 1.11B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 to 34: Percentages, 2015 and 2016
- 1.12A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 35 or Older: Numbers in Thousands, 2015 and 2016
- 1.12B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 35 or Older: Percentages, 2015 and 2016

LIST OF TABLES (Continued)

Table

- 1.13A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Males Aged 12 or Older: Numbers in Thousands, 2015 and 2016
- 1.13B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Males Aged 12 or Older: Percentages, 2015 and 2016
- 1.14A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Females Aged 12 or Older: Numbers in Thousands, 2015 and 2016
- 1.14B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Females Aged 12 or Older: Percentages, 2015 and 2016
- 1.15A Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
- 1.15B Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
- 1.16A Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
- 1.16B Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
- 1.17A Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
- 1.17B Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
- 1.18A Crack Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
- 1.18B Crack Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
- 1.19A Hallucinogen Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
- 1.19B Hallucinogen Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
- 1.20A Inhalant Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
- 1.20B Inhalant Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
- 1.21A Methamphetamine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
- 1.21B Methamphetamine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
- 1.22A Any Use of Prescription Psychotherapeutics in Past Year and Misuse of Prescription Psychotherapeutics in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
- 1.22B Any Use of Prescription Psychotherapeutics in Past Year and Misuse of Prescription Psychotherapeutics in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
- 1.23A Any Use of Pain Relievers in Past Year and Misuse of Pain Relievers in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
- 1.23B Any Use of Pain Relievers in Past Year and Misuse of Pain Relievers in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
- 1.24A Any Use of Tranquilizers in Past Year and Misuse of Tranquilizers in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
- 1.24B Any Use of Tranquilizers in Past Year and Misuse of Tranquilizers in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016

- 1.106A Any Use and Misuse of Tranquilizers in Past Year among Persons Aged 26 or Older and Misuse of Tranquilizers in Past Year among Past Year Any Users of Tranquilizers Aged 26 or Older, by Tranquilizer Subtype: Numbers in Thousands, 2015 and 2016
- 1.106B Any Use and Misuse of Tranquilizers in Past Year among Persons Aged 26 or Older and Misuse of Tranquilizers in Past Year among Past Year Any Users of Tranquilizers Aged 26 or Older, by Tranquilizer Subtype: Percentages, 2015 and 2016
- 1.107A Any Use and Misuse of Stimulants in Past Year among Persons Aged 12 or Older and Misuse of Stimulants in Past Year among Past Year Any Users of Stimulants Aged 12 or Older, by Stimulant Subtype: Numbers in Thousands, 2015 and 2016
- 1.107B Any Use and Misuse of Stimulants in Past Year among Persons Aged 12 or Older and Misuse of Stimulants in Past Year among Past Year Any Users of Stimulants Aged 12 or Older, by Stimulant Subtype: Percentages, 2015 and 2016
- 1.108A Any Use and Misuse of Stimulants in Past Year among Persons Aged 12 to 17 and Misuse of Stimulants in Past Year among Past Year Any Users of Stimulants Aged 12 to 17, by Stimulant Subtype: Numbers in Thousands, 2015 and 2016
- 1.108B Any Use and Misuse of Stimulants in Past Year among Persons Aged 12 to 17 and Misuse of Stimulants in Past Year among Past Year Any Users of Stimulants Aged 12 to 17, by Stimulant Subtype: Percentages, 2015 and 2016
- 1.109A Any Use and Misuse of Stimulants in Past Year among Persons Aged 18 or Older and Misuse of Stimulants in Past Year among Past Year Any Users of Stimulants Aged 18 or Older, by Stimulant Subtype: Numbers in Thousands, 2015 and 2016
- 1.109B Any Use and Misuse of Stimulants in Past Year among Persons Aged 18 or Older and Misuse of Stimulants in Past Year among Past Year Any Users of Stimulants Aged 18 or Older, by Stimulant Subtype: Percentages, 2015 and 2016
- 1.110A Any Use and Misuse of Stimulants in Past Year among Persons Aged 18 to 25 and Misuse of Stimulants in Past Year among Past Year Any Users of Stimulants Aged 18 to 25, by Stimulant Subtype: Numbers in Thousands, 2015 and 2016
- 1.110B Any Use and Misuse of Stimulants in Past Year among Persons Aged 18 to 25 and Misuse of Stimulants in Past Year among Past Year Any Users of Stimulants Aged 18 to 25, by Stimulant Subtype: Percentages, 2015 and 2016
- 1.111A Any Use and Misuse of Stimulants in Past Year among Persons Aged 26 or Older and Misuse of Stimulants in Past Year among Past Year Any Users of Stimulants Aged 26 or Older, by Stimulant Subtype: Numbers in Thousands, 2015 and 2016
- 1.111B Any Use and Misuse of Stimulants in Past Year among Persons Aged 26 or Older and Misuse of Stimulants in Past Year among Past Year Any Users of Stimulants Aged 26 or Older, by Stimulant Subtype: Percentages, 2015 and 2016
- 1.112A Any Use and Misuse of Sedatives in Past Year among Persons Aged 12 or Older and Misuse of Sedatives in Past Year among Past Year Any Users of Sedatives Aged 12 or Older, by Sedative Subtype: Numbers in Thousands, 2015 and 2016
- 1.112B Any Use and Misuse of Sedatives in Past Year among Persons Aged 12 or Older and Misuse of Sedatives in Past Year among Past Year Any Users of Sedatives Aged 12 or Older, by Sedative Subtype: Percentages, 2015 and 2016
- 1.113A Any Use and Misuse of Sedatives in Past Year among Persons Aged 12 to 17 and Misuse of Sedatives in Past Year among Past Year Any Users of Sedatives Aged 12 to 17, by Sedative Subtype: Numbers in Thousands, 2015 and 2016
- 1.113B Any Use and Misuse of Sedatives in Past Year among Persons Aged 12 to 17 and Misuse of Sedatives in Past Year among Past Year Any Users of Sedatives Aged 12 to 17, by Sedative Subtype: Percentages, 2015 and 2016
- 1.114A Any Use and Misuse of Sedatives in Past Year among Persons Aged 18 or Older and Misuse of Sedatives in Past Year among Past Year Any Users of Sedatives Aged 18 or Older, by Sedative Subtype: Numbers in Thousands, 2015 and 2016
- 1.114B Any Use and Misuse of Sedatives in Past Year among Persons Aged 18 or Older and Misuse of Sedatives in Past Year among Past Year Any Users of Sedatives Aged 18 or Older, by Sedative Subtype: Percentages, 2015 and 2016

- 3.8A Perceived That Obtaining Specific Illicit Drugs Would Be Fairly or Very Easy among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.8B Perceived That Obtaining Specific Illicit Drugs Would Be Fairly or Very Easy among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.9A Youths Felt That Parents Would Strongly Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.9B Youths Felt That Parents Would Strongly Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.10A Youths Felt That Close Friends Would Strongly Disapprove or Somewhat Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.10B Youths Felt That Close Friends Would Strongly Disapprove or Somewhat Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.11A Youths Strongly Disapproved or Somewhat Disapproved of Peers' Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.11B Youths Strongly Disapproved or Somewhat Disapproved of Peers' Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016

LIST OF TABLES (Continued)

Table

- 3.12A Participated in a Prevention Program or Group in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.12B Participated in a Prevention Program or Group in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.13A Participated in a Substance Use Program or Exposed to Substance Use Prevention Message in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.13B Participated in a Substance Use Program or Exposed to Substance Use Prevention Message in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.14A Participated in a Physical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.14B Participated in a Physical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.15A Participated in a Nonphysical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.15B Participated in a Nonphysical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.16A Selected Risk and Protective Factors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.16B Selected Risk and Protective Factors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.17A Youths Agreed or Strongly Agreed with Statements about Religious Beliefs among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.17B Youths Agreed or Strongly Agreed with Statements about Religious Beliefs among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.18A Parents Always or Sometimes Took Part in Specific Behaviors in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.18B Parents Always or Sometimes Took Part in Specific Behaviors in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.19A Measures of Student Characteristics in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.19B Measures of Student Characteristics in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.20A Adults Always or Sometimes Took Part in Specific School-Related Behaviors in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.20B Adults Always or Sometimes Took Part in Specific School-Related Behaviors in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.21A Youths Perceived That All or Most Students in Grade Level Use Specific Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Numbers in Thousands, 2015 and 2016
- 3.21B Youths Perceived That All or Most Students in Grade Level Use Specific Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Percentages, 2015 and 2016
- 3.22A Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Risk of Harm Associated with Substance Use Behaviors: Numbers in Thousands, 2016
- 3.22B Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Risk of Harm Associated with Substance Use Behaviors: Percentages, 2016

Table

3.23A	Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Availability of Selected Illicit Drugs: Numbers in Thousands, 2016
3.23B	Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Availability of Selected Illicit Drugs: Percentages, 2016
3.24A	Perceived Availability of Selected Illicit Drugs among Persons Aged 12 or Older, by Past Month Substance Use Status: Numbers in Thousands, 2016
3.24B	Perceived Availability of Selected Illicit Drugs among Persons Aged 12 or Older, by Past Month Substance Use Status: Percentages, 2016
3.25A	Perceived Availability of Selected Illicit Drugs among Persons Aged 12 to 17, by Past Month Substance Use Status: Numbers in Thousands, 2016
3.25B	Perceived Availability of Selected Illicit Drugs among Persons Aged 12 to 17, by Past Month Substance Use Status: Percentages, 2016
3.26A	Perceived Availability of Selected Illicit Drugs among Persons Aged 18 or Older, by Past Month Substance Use Status: Numbers in Thousands, 2016
3.26B	Perceived Availability of Selected Illicit Drugs among Persons Aged 18 or Older, by Past Month Substance Use Status: Percentages, 2016
3.27A	Perceived Availability of Selected Illicit Drugs among Persons Aged 18 to 25, by Past Month Substance Use Status: Numbers in Thousands, 2016
3.27B	Perceived Availability of Selected Illicit Drugs among Persons Aged 18 to 25, by Past Month Substance Use Status: Percentages, 2016
3.28A	Perceived Availability of Selected Illicit Drugs among Persons Aged 26 or Older, by Past Month Substance Use Status: Numbers in Thousands, 2016
3.28B	Perceived Availability of Selected Illicit Drugs among Persons Aged 26 or Older, by Past Month Substance Use Status: Percentages, 2016
3.29A	Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Parents' Feelings about Substance Use Behaviors: Numbers in Thousands, 2016
3.29B	Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Parents' Feelings about Substance Use Behaviors: Percentages, 2016
3.30A	Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Close Friends' Feelings and Youth's Feelings about Peers' Substance Use Behaviors: Numbers in Thousands, 2016
3.30B	Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Close Friends' Feelings and Youth's Feelings about Peers' Substance Use Behaviors: Percentages, 2016
3.31A	Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Youth's Participation in Prevention or Substance Use Programs and Exposure to Substance Use Prevention Messages and Youth's Delinquency in Past Year: Numbers in Thousands, 2016
3.31B	Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Youth's Participation in Prevention or Substance Use Programs and Exposure to Substance Use Prevention Messages and Youth's Delinquency in Past Year: Percentages, 2016
3.32A	Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Risk and Protective Factors, Religious Beliefs, and Past Year Parental Involvement: Numbers in Thousands, 2016
3.32B	Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Risk and Protective Factors, Religious Beliefs, and Past Year Parental Involvement: Percentages, 2016
3.33A	Past Month Use of Selected Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Measures of Scholastic Environment: Numbers in Thousands, 2016
3.33B	Past Month Use of Selected Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Measures of Scholastic Environment: Percentages, 2016

LIST OF TABLES (Continued)

Table

- 4.1B Past Year Initiation of Marijuana Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Marijuana Use, and Past Year Marijuana Users Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2015 and 2016
- 4.2B Past Year Initiation of Cigarette Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Cigarette Use, and Past Year Cigarette Users Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2015 and 2016
- 4.3B Past Year Initiation of Alcohol Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Alcohol Use, and Past Year Alcohol Users Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2015 and 2016
- 4.4B Past Year Initiation of Substance Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 or Older: Numbers in Thousands and Percentages, 2015 and 2016
- 4.5B Past Year Initiation of Substance Use among Persons Aged 12 to 17, Persons Aged 12 to 17 at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 to 17: Numbers in Thousands and Percentages, 2015 and 2016
- 4.6B Past Year Initiation of Substance Use among Persons Aged 18 or Older, Persons Aged 18 or Older at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 or Older: Numbers in Thousands and Percentages, 2015 and 2016
- 4.7B Past Year Initiation of Substance Use among Persons Aged 18 to 25, Persons Aged 18 to 25 at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 to 25: Numbers in Thousands and Percentages, 2015 and 2016
- 4.8B Past Year Initiation of Substance Use among Persons Aged 26 or Older, Persons Aged 26 or Older at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 26 or Older: Numbers in Thousands and Percentages, 2015 and 2016
- 4.9A Past Year Initiation of Substance Use among Persons Aged 12 or Older, by Gender: Numbers in Thousands, 2015 and 2016
- 4.10A Past Year Initiation of Substance Use among Persons Aged 12 or Older Who Initiated Use Prior to Age 18, by Gender: Numbers in Thousands, 2015 and 2016
- 4.11A Past Year Initiation of Substance Use among Persons Aged 12 or Older Who Initiated Use Prior to Age 21, by Gender: Numbers in Thousands, 2015 and 2016
- 4.12A Past Year Initiation of Substance Use among Persons Aged 12 to 49, by Gender: Numbers in Thousands, 2015 and 2016
- 4.13B Mean Age at First Substance Use among Past Year Initiates Aged 12 to 49, by Gender: 2015 and 2016
- 5.1A Substance Use Disorder Status in Past Year among Persons Aged 12 or Older: Numbers in Thousands, 2015 and 2016
- 5.1B Substance Use Disorder Status in Past Year among Persons Aged 12 or Older: Percentages, 2015 and 2016
- 5.2A Substance Use Disorder for Specific Substances in Past Year among Persons Aged 12 or Older, by Age Group: Numbers in Thousands, 2015 and 2016
- 5.2B Substance Use Disorder for Specific Substances in Past Year among Persons Aged 12 or Older, by Age Group: Percentages, 2015 and 2016
- 5.3A Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
- 5.3B Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016

LIST OF TABLES (Continued)

Table

5.4A	Illicit Drug Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
5.4B	Illicit Drug Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Percentages, 2015 and 2016
5.5A	Alcohol Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
5.5B	Alcohol Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Percentages, 2015 and 2016
5.6A	Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
5.6B	Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Percentages, 2015 and 2016
5.7A	Illicit Drug Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Numbers in Thousands, 2015 and 2016
5.7B	Illicit Drug Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Percentages, 2015 and 2016
5.8A	Alcohol Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Numbers in Thousands, 2015 and 2016
5.8B	Alcohol Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Percentages, 2015 and 2016
5.9A	Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Numbers in Thousands, 2015 and 2016
5.9B	Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Percentages, 2015 and 2016
5.10A	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
5.10B	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
5.11A	Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
5.11B	Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Percentages, 2015 and 2016
5.12A	Received Alcohol Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
5.12B	Received Alcohol Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Percentages, 2015 and 2016
5.13A	Received Both Illicit Drug and Alcohol Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
5.13B	Received Both Illicit Drug and Alcohol Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Percentages, 2015 and 2016
5.14A	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
5.14B	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Percentages, 2015 and 2016
5.15A	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Numbers in Thousands, 2015 and 2016
5.15B	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Percentages, 2015 and 2016

LIST OF TABLES (Continued)

Table

5.16A	Type of Substance Use Treatment Received at Any Location in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
5.16B	Type of Substance Use Treatment Received at Any Location in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use in Past Year, by Age Group: Percentages, 2015 and 2016
5.17A	Substances for Which Last or Current Treatment Was Received among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
5.17B	Substances for Which Last or Current Treatment Was Received among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: Percentages, 2015 and 2016
5.18A	Locations Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
5.18B	Locations Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: Percentages, 2015 and 2016
5.19A	Locations Received Alcohol Treatment in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
5.19B	Locations Received Alcohol Treatment in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: Percentages, 2015 and 2016
5.20A	Locations Received Substance Use Treatment in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
5.20B	Locations Received Substance Use Treatment in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: Percentages, 2015 and 2016
5.21A	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands, 2015 and 2016
5.21B	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
5.22A	Received Illicit Drug Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands, 2015 and 2016
5.22B	Received Illicit Drug Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2015 and 2016
5.23A	Received Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands, 2015 and 2016
5.23B	Received Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2015 and 2016
5.24A	Received Both Illicit Drug and Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands, 2015 and 2016
5.24B	Received Both Illicit Drug and Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2015 and 2016
5.25A	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands, 2015 and 2016
5.25B	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2015 and 2016
5.26A	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Numbers in Thousands, 2015 and 2016
5.26B	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Percentages, 2015 and 2016

LIST OF TABLES (Continued)

Table

- 5.27A Type of Substance Use Treatment Received at a Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
- 5.27B Type of Substance Use Treatment Received at a Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use at a Specialty Facility in Past Year, by Age Group: Percentages, 2015 and 2016
- 5.28A Substances for Which Last or Current Treatment Was Received among Persons Aged 12 or Older Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
- 5.28B Substances for Which Last or Current Treatment Was Received among Persons Aged 12 or Older Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2015 and 2016
- 5.29A Locations Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
- 5.29B Locations Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2015 and 2016
- 5.30A Locations Received Alcohol Treatment in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
- 5.30B Locations Received Alcohol Treatment in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2015 and 2016
- 5.31A Locations Received Substance Use Treatment in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
- 5.31B Locations Received Substance Use Treatment in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2015 and 2016
- 5.32A Source of Payment for Last or Current Illicit Drug Treatment among Persons Aged 12 or Older Who Received Their Last or Current Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
- 5.32B Source of Payment for Last or Current Illicit Drug Treatment among Persons Aged 12 or Older Who Received Their Last or Current Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2015 and 2016
- 5.33A Source of Payment for Last or Current Alcohol Treatment among Persons Aged 12 or Older Who Received Their Last or Current Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
- 5.33B Source of Payment for Last or Current Alcohol Treatment among Persons Aged 12 or Older Who Received Their Last or Current Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2015 and 2016
- 5.34A Source of Payment for Last or Current Substance Use Treatment among Persons Aged 12 or Older Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
- 5.34B Source of Payment for Last or Current Substance Use Treatment among Persons Aged 12 or Older Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2015 and 2016
- 5.35A Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder of Specific Substances: Numbers in Thousands, 2015 and 2016
- 5.35B Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder of Specific Substances: Percentages, 2015 and 2016

Table

- 5.45A Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Numbers in Thousands and Percentages, 2015 and 2016
- 5.45B Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Percentages, 2015 and 2016
- 5.46A Perceived Need for Illicit Drug Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug Problem, by Demographic Characteristics: Numbers in Thousands, 2015 and 2016
- 5.46B Perceived Need for Illicit Drug Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug Problem, by Demographic Characteristics: Percentages, 2015 and 2016
- 5.47A Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2015 and 2016
- 5.47B Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2015 and 2016
- 5.48A Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2015 and 2016
- 5.48B Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Percentages, 2015 and 2016
- 5.49A Perceived Need for Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Alcohol Problem, by Demographic Characteristics: Numbers in Thousands, 2015 and 2016
- 5.49B Perceived Need for Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Alcohol Problem, by Demographic Characteristics: Percentages, 2015 and 2016
- 5.50A Need for and Receipt of Treatment at a Specialty Facility for a Substance Use Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2015 and 2016
- 5.50B Need for and Receipt of Treatment at a Specialty Facility for a Substance Use Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2015 and 2016
- 5.51A Need for and Receipt of Treatment at a Specialty Facility for a Substance Use Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2015 and 2016
- 5.51B Need for and Receipt of Treatment at a Specialty Facility for a Substance Use Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Percentages, 2015 and 2016
- 5.52A Perceived Need for Substance Use Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for a Substance Use Problem, by Demographic Characteristics: Numbers in Thousands, 2015 and 2016
- 5.52B Perceived Need for Substance Use Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for a Substance Use Problem, by Demographic Characteristics: Percentages, 2015 and 2016
- 5.53A Detailed Reasons for Not Receiving Substance Use Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Substance Use Treatment at a Specialty Facility and Who Felt a Need for Substance Use Treatment in Past Year: Numbers in Thousands, 2016
- 5.53B Detailed Reasons for Not Receiving Substance Use Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Substance Use Treatment at a Specialty Facility and Who Felt a Need for Substance Use Treatment in Past Year: Percentages, 2016

LIST OF TABLES (Continued)

Table

- 5.54A Detailed Reasons for Not Receiving Substance Use Treatment in Past Year among Persons Aged 18 or Older Classified as Needing But Not Receiving Substance Use Treatment at a Specialty Facility and Who Felt a Need for Substance Use Treatment in Past Year: Numbers in Thousands, 2016
- 5.54B Detailed Reasons for Not Receiving Substance Use Treatment in Past Year among Persons Aged 18 or Older Classified as Needing But Not Receiving Substance Use Treatment at a Specialty Facility and Who Felt a Need for Substance Use Treatment in Past Year: Percentages, 2016
- 6.1A Number of Days Used Marijuana in Past Year among Past Year Users and Number of Days Used Marijuana in Past Month among Past Month Users Aged 12 or Older, by Age Group: Numbers in Thousands and Averages, 2015 and 2016
- 6.1B Number of Days Used Marijuana in Past Year among Past Year Users and Number of Days Used Marijuana in Past Month among Past Month Users Aged 12 or Older, by Age Group: Percentages and Averages, 2015 and 2016
- 6.2A Number of Days Used Cocaine in Past Year among Past Year Users and Number of Days Used Cocaine in Past Month among Past Month Users Aged 12 or Older, by Age Group: Numbers in Thousands and Averages, 2015 and 2016
- 6.2B Number of Days Used Cocaine in Past Year among Past Year Users and Number of Days Used Cocaine in Past Month among Past Month Users Aged 12 or Older, by Age Group: Percentages and Averages, 2015 and 2016
- 6.3A Number of Days Used Hallucinogens in Past Year among Past Year Users and Number of Days Used Hallucinogens in Past Month among Past Month Users Aged 12 or Older, by Age Group: Numbers in Thousands and Averages, 2015 and 2016
- 6.3B Number of Days Used Hallucinogens in Past Year among Past Year Users and Number of Days Used Hallucinogens in Past Month among Past Month Users Aged 12 or Older, by Age Group: Percentages and Averages, 2015 and 2016
- 6.4A Number of Days Used Inhalants in Past Year among Past Year Users and Number of Days Used Inhalants in Past Month among Past Month Users Aged 12 or Older, by Age Group: Numbers in Thousands and Averages, 2015 and 2016
- 6.4B Number of Days Used Inhalants in Past Year among Past Year Users and Number of Days Used Inhalants in Past Month among Past Month Users Aged 12 or Older, by Age Group: Percentages and Averages, 2015 and 2016
- 6.5A Number of Days Used Methamphetamine in Past Year among Past Year Users and Number of Days Used Methamphetamine in Past Month among Past Month Users Aged 12 or Older, by Age Group: Numbers in Thousands and Averages, 2015 and 2016
- 6.5B Number of Days Used Methamphetamine in Past Year among Past Year Users and Number of Days Used Methamphetamine in Past Month among Past Month Users Aged 12 or Older, by Age Group: Percentages and Averages, 2015 and 2016
- 6.6A Number of Days Misused Prescription Psychotherapeutics in Past Month among Past Month Misusers Aged 12 or Older, by Age Group: Numbers in Thousands and Averages, 2015 and 2016
- 6.6B Number of Days Misused Prescription Psychotherapeutics in Past Month among Past Month Misusers Aged 12 or Older, by Age Group: Percentages and Averages, 2015 and 2016
- 6.7A Number of Days Used Cigarettes in Past Month among Past Month Users and Number of Cigarettes Smoked Per Day among Daily Smokers Aged 12 or Older, by Age Group: Numbers in Thousands and Averages, 2015 and 2016
- 6.7B Number of Days Used Cigarettes in Past Month among Past Month Users and Number of Cigarettes Smoked Per Day among Daily Smokers Aged 12 or Older, by Age Group: Percentages and Averages, 2015 and 2016
- 6.8A Number of Days Used Alcohol in Past Year among Past Year Users and Number of Days Used Alcohol in Past Month among Past Month Users Aged 12 or Older, by Age Group: Numbers in Thousands and Averages, 2015 and 2016
- 6.8B Number of Days Used Alcohol in Past Year among Past Year Users and Number of Days Used Alcohol in Past Month among Past Month Users Aged 12 or Older, by Age Group: Percentages and Averages, 2015 and 2016

LIST OF TABLES (Continued)

Table

- 6.9A Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Numbers in Thousands, 2015 and 2016
- 6.9B Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Percentages, 2015 and 2016
- 6.10A Any Use and Misuse of Pain Relievers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Numbers in Thousands, 2015 and 2016
- 6.10B Any Use and Misuse of Pain Relievers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Percentages, 2015 and 2016
- 6.11A Any Use and Misuse of Tranquilizers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Numbers in Thousands, 2015 and 2016
- 6.11B Any Use and Misuse of Tranquilizers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Percentages, 2015 and 2016
- 6.12A Any Use and Misuse of Stimulants in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Numbers in Thousands, 2015 and 2016
- 6.12B Any Use and Misuse of Stimulants in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Percentages, 2015 and 2016
- 6.13A Any Use and Misuse of Sedatives in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Numbers in Thousands, 2015 and 2016
- 6.13B Any Use and Misuse of Sedatives in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Percentages, 2015 and 2016
- 6.14A Types of Illicit Drug Use in Past Month among Persons Aged 12 or Older, by Past Month Cigarette Use: Numbers in Thousands, 2015 and 2016
- 6.14B Types of Illicit Drug Use in Past Month among Persons Aged 12 or Older, by Past Month Cigarette Use: Percentages, 2015 and 2016
- 6.15A Types of Illicit Drug Use in Past Month among Persons Aged 12 to 17, by Past Month Cigarette Use: Numbers in Thousands, 2015 and 2016
- 6.15B Types of Illicit Drug Use in Past Month among Persons Aged 12 to 17, by Past Month Cigarette Use: Percentages, 2015 and 2016
- 6.16A Types of Illicit Drug Use in Past Month among Persons Aged 18 or Older, by Past Month Cigarette Use: Numbers in Thousands, 2015 and 2016
- 6.16B Types of Illicit Drug Use in Past Month among Persons Aged 18 or Older, by Past Month Cigarette Use: Percentages, 2015 and 2016
- 6.17A Types of Illicit Drug Use in Past Month among Persons Aged 18 to 25, by Past Month Cigarette Use: Numbers in Thousands, 2015 and 2016
- 6.17B Types of Illicit Drug Use in Past Month among Persons Aged 18 to 25, by Past Month Cigarette Use: Percentages, 2015 and 2016
- 6.18A Types of Illicit Drug Use in Past Month among Persons Aged 26 or Older, by Past Month Cigarette Use: Numbers in Thousands, 2015 and 2016
- 6.18B Types of Illicit Drug Use in Past Month among Persons Aged 26 or Older, by Past Month Cigarette Use: Percentages, 2015 and 2016
- 6.19A Types of Illicit Drug Use in Past Month among Persons Aged 12 or Older, by Levels of Past Month Alcohol Use: Numbers in Thousands, 2015 and 2016
- 6.19B Types of Illicit Drug Use in Past Month among Persons Aged 12 or Older, by Levels of Past Month Alcohol Use: Percentages, 2015 and 2016
- 6.20A Types of Illicit Drug Use in Past Month among Persons Aged 12 to 17, by Levels of Past Month Alcohol Use: Numbers in Thousands, 2015 and 2016
- 6.20B Types of Illicit Drug Use in Past Month among Persons Aged 12 to 17, by Levels of Past Month Alcohol Use: Percentages, 2015 and 2016

LIST OF TABLES (Continued)

Table

- 6.21A Types of Illicit Drug Use in Past Month among Persons Aged 18 or Older, by Levels of Past Month Alcohol Use: Numbers in Thousands, 2015 and 2016
- 6.21B Types of Illicit Drug Use in Past Month among Persons Aged 18 or Older, by Levels of Past Month Alcohol Use: Percentages, 2015 and 2016
- 6.22A Types of Illicit Drug Use in Past Month among Persons Aged 18 to 25, by Levels of Past Month Alcohol Use: Numbers in Thousands, 2015 and 2016
- 6.22B Types of Illicit Drug Use in Past Month among Persons Aged 18 to 25, by Levels of Past Month Alcohol Use: Percentages, 2015 and 2016
- 6.23A Types of Illicit Drug Use in Past Month among Persons Aged 26 or Older, by Levels of Past Month Alcohol Use: Numbers in Thousands, 2015 and 2016
- 6.23B Types of Illicit Drug Use in Past Month among Persons Aged 26 or Older, by Levels of Past Month Alcohol Use: Percentages, 2015 and 2016
- 6.24A Types of Illicit Drug Use in Past Month among Past Month Alcohol Users Aged 12 or Older, by Age Group and Underage and Legal Drinking Age Group: Numbers in Thousands, 2015 and 2016
- 6.24B Types of Illicit Drug Use in Past Month among Past Month Alcohol Users Aged 12 or Older, by Age Group and Underage and Legal Drinking Age Group: Percentages, 2015 and 2016
- 6.25A Drugs Used with Alcohol or within 2 Hours of Alcohol Use on Most Recent Use of Alcohol in Past Month among Past Month Alcohol Users Aged 12 or Older, by Age Group and Underage and Legal Drinking Age Group: Numbers in Thousands, 2015 and 2016
- 6.25B Drugs Used with Alcohol or within 2 Hours of Alcohol Use on Most Recent Use of Alcohol in Past Month among Past Month Alcohol Users Aged 12 or Older, by Age Group and Underage and Legal Drinking Age Group: Percentages, 2015 and 2016
- 6.26A Types of Illicit Drug Use in Past Month among Persons Aged 12 or Older, by Past Month Cigarette and Alcohol Use: Numbers in Thousands, 2015 and 2016
- 6.26B Types of Illicit Drug Use in Past Month among Persons Aged 12 or Older, by Past Month Cigarette and Alcohol Use: Percentages, 2015 and 2016
- 6.27A Types of Illicit Drug Use in Past Month among Persons Aged 12 to 17, by Past Month Cigarette and Alcohol Use: Numbers in Thousands, 2015 and 2016
- 6.27B Types of Illicit Drug Use in Past Month among Persons Aged 12 to 17, by Past Month Cigarette and Alcohol Use: Percentages, 2015 and 2016
- 6.28A Types of Illicit Drug Use in Past Month among Persons Aged 18 or Older, by Past Month Cigarette and Alcohol Use: Numbers in Thousands, 2015 and 2016
- 6.28B Types of Illicit Drug Use in Past Month among Persons Aged 18 or Older, by Past Month Cigarette and Alcohol Use: Percentages, 2015 and 2016
- 6.29A Types of Illicit Drug Use in Past Month among Persons Aged 18 to 25, by Past Month Cigarette and Alcohol Use: Numbers in Thousands, 2015 and 2016
- 6.29B Types of Illicit Drug Use in Past Month among Persons Aged 18 to 25, by Past Month Cigarette and Alcohol Use: Percentages, 2015 and 2016
- 6.30A Types of Illicit Drug Use in Past Month among Persons Aged 26 or Older, by Past Month Cigarette and Alcohol Use: Numbers in Thousands, 2015 and 2016
- 6.30B Types of Illicit Drug Use in Past Month among Persons Aged 26 or Older, by Past Month Cigarette and Alcohol Use: Percentages, 2015 and 2016
- 6.31A Illicit Drug Use in Past Month, by Past Month Cigarette Use, Levels of Past Month Alcohol Use, and Age Group: Numbers in Thousands, 2015 and 2016
- 6.31B Illicit Drug Use in Past Month, by Past Month Cigarette Use, Levels of Past Month Alcohol Use, and Age Group: Percentages, 2015 and 2016
- 6.32A Tobacco Product and Alcohol Use in Past Month among Persons Aged 12 or Older, by Past Month Cigarette Use: Numbers in Thousands, 2015 and 2016
- 6.32B Tobacco Product and Alcohol Use in Past Month among Persons Aged 12 or Older, by Past Month Cigarette Use: Percentages, 2015 and 2016

Table

6.45A	Marijuana Use in Prior Year and Past Year Marijuana Use Status among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands, 2015 and 2016
6.45B	Marijuana Use in Prior Year and Past Year Marijuana Use Status among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2015 and 2016
6.46A	Cigarette Use and Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Detailed Age Category: Numbers in Thousands and Percentages, 2015 and 2016
6.46B	Cigarette Use and Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Detailed Age Category: Percentages, 2015 and 2016
6.47A	Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
6.47B	Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Percentages, 2015 and 2016
6.48A	Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Numbers in Thousands, 2015 and 2016
6.48B	Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Percentages, 2015 and 2016
6.49A	Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
6.49B	Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes and Demographic Characteristics: Percentages, 2015 and 2016
6.50A	Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes Daily and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
6.50B	Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes Daily and Demographic Characteristics: Percentages, 2015 and 2016
6.51A	Illicit Drug Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Marijuana and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
6.51B	Illicit Drug Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Marijuana and Demographic Characteristics: Percentages, 2015 and 2016
6.52A	Alcohol Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Alcohol and Demographic Characteristics: Numbers in Thousands, 2015 and 2016
6.52B	Alcohol Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Alcohol and Demographic Characteristics: Percentages, 2015 and 2016
6.53A	Source Where Pain Relievers Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Numbers in Thousands, 2015 and 2016
6.53B	Source Where Pain Relievers Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Percentages, 2015 and 2016
6.54A	Source Where Friend or Relative Obtained Pain Relievers among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Pain Relievers from a Friend or Relative for Free in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
6.54B	Source Where Friend or Relative Obtained Pain Relievers among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Pain Relievers from a Friend or Relative for Free in Past Year, by Age Group: Percentages, 2015 and 2016
6.55A	Source Where Tranquilizers Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Numbers in Thousands, 2015 and 2016
6.55B	Source Where Tranquilizers Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Percentages, 2015 and 2016

LIST OF TABLES (Continued)

Table

- 6.56A Source Where Friend or Relative Obtained Tranquilizers among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Tranquilizers from a Friend or Relative for Free in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
- 6.56B Source Where Friend or Relative Obtained Tranquilizers among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Tranquilizers from a Friend or Relative for Free in Past Year, by Age Group: Percentages, 2015 and 2016
- 6.57A Source Where Stimulants Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Numbers in Thousands, 2015 and 2016
- 6.57B Source Where Stimulants Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Percentages, 2015 and 2016
- 6.58A Source Where Friend or Relative Obtained Stimulants among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Stimulants from a Friend or Relative for Free in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
- 6.58B Source Where Friend or Relative Obtained Stimulants among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Stimulants from a Friend or Relative for Free in Past Year, by Age Group: Percentages, 2015 and 2016
- 6.59A Source Where Sedatives Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Numbers in Thousands, 2015 and 2016
- 6.59B Source Where Sedatives Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Percentages, 2015 and 2016
- 6.60A Source Where Friend or Relative Obtained Sedatives among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Sedatives from a Friend or Relative for Free in Past Year, by Age Group: Numbers in Thousands, 2015 and 2016
- 6.60B Source Where Friend or Relative Obtained Sedatives among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Sedatives from a Friend or Relative for Free in Past Year, by Age Group: Percentages, 2015 and 2016
- 6.61A Main Reasons for Last Episode of Misuse of Prescription Psychotherapeutics among Past Year Misusers Aged 12 or Older of Each Type of Prescription Psychotherapeutic: Numbers in Thousands, 2015 and 2016
- 6.61B Main Reasons for Last Episode of Misuse of Prescription Psychotherapeutics among Past Year Misusers Aged 12 or Older of Each Type of Prescription Psychotherapeutic: Percentages, 2015 and 2016
- 6.62A Main Reasons for Last Episode of Misuse of Prescription Psychotherapeutics among Past Year Misusers Aged 18 or Older of Each Type of Prescription Psychotherapeutic: Numbers in Thousands, 2015 and 2016
- 6.62B Main Reasons for Last Episode of Misuse of Prescription Psychotherapeutics among Past Year Misusers Aged 18 or Older of Each Type of Prescription Psychotherapeutic: Percentages, 2015 and 2016
- 6.63A Social Context and Location of Most Recent Alcohol Use in Past Month among Past Month Alcohol Users Aged 12 to 20, by Age Group and Gender: Numbers in Thousands, 2015 and 2016
- 6.63B Social Context and Location of Most Recent Alcohol Use in Past Month among Past Month Alcohol Users Aged 12 to 20, by Age Group and Gender: Percentages, 2015 and 2016
- 6.64A Source Where Alcohol Was Obtained for Most Recent Use in Past Month among Past Month Alcohol Users Aged 12 to 20, by Age Group and Gender: Numbers in Thousands, 2015 and 2016
- 6.64B Source Where Alcohol Was Obtained for Most Recent Use in Past Month among Past Month Alcohol Users Aged 12 to 20, by Age Group and Gender: Percentages, 2015 and 2016

12.9N	Survey Sample Size for Respondents Aged 18 or Older, by Past Year Probation and Parole/Supervised Release Statuses and Demographic Characteristics: 2015 and 2016

LIST OF TABLES

Table

- 1.1C Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.1D Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older: Standard Errors of Percentages, 2015 and 2016
- 1.1P Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.2C Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.2D Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17: Standard Errors of Percentages, 2015 and 2016
- 1.2P Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.3C Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or 13: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.3D Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or 13: Standard Errors of Percentages, 2015 and 2016
- 1.3P Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or 13: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.4C Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 14 or 15: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.4D Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 14 or 15: Standard Errors of Percentages, 2015 and 2016
- 1.4P Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 14 or 15: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.5C Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 16 or 17: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.5D Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 16 or 17: Standard Errors of Percentages, 2015 and 2016
- 1.5P Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 16 or 17: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.6C Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.6D Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older: Standard Errors of Percentages, 2015 and 2016
- 1.6P Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.7C Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.7D Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25: Standard Errors of Percentages, 2015 and 2016
- 1.7P Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.8C Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 20: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.8D Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 20: Standard Errors of Percentages, 2015 and 2016
- 1.8P Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 20: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

1.9C	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 21 to 25: Standard Errors of Numbers in Thousands, 2015 and 2016
1.9D	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 21 to 25: Standard Errors of Percentages, 2015 and 2016
1.9P	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 21 to 25: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
1.10C	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 or Older: Standard Errors of Numbers in Thousands, 2015 and 2016
1.10D	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 or Older: Standard Errors of Percentages, 2015 and 2016
1.10P	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 or Older: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
1.11C	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 to 34: Standard Errors of Numbers in Thousands, 2015 and 2016
1.11D	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 to 34: Standard Errors of Percentages, 2015 and 2016
1.11P	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 to 34: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
1.12C	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 35 or Older: Standard Errors of Numbers in Thousands, 2015 and 2016
1.12D	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 35 or Older: Standard Errors of Percentages, 2015 and 2016
1.12P	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 35 or Older: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
1.13C	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Males Aged 12 or Older: Standard Errors of Numbers in Thousands, 2015 and 2016
1.13D	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Males Aged 12 or Older: Standard Errors of Percentages, 2015 and 2016
1.13P	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Males Aged 12 or Older: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
1.14C	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Females Aged 12 or Older: Standard Errors of Numbers in Thousands, 2015 and 2016
1.14D	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Females Aged 12 or Older: Standard Errors of Percentages, 2015 and 2016
1.14P	Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Females Aged 12 or Older: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
1.15C	Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
1.15D	Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
1.15P	Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
1.16C	Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
1.16D	Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
1.16P	Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
1.17C	Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
1.17D	Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
1.17P	Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 1.18C Crack Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.18D Crack Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 1.18P Crack Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.19C Hallucinogen Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.19D Hallucinogen Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 1.19P Hallucinogen Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.20C Inhalant Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.20D Inhalant Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 1.20P Inhalant Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.21C Methamphetamine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.21D Methamphetamine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 1.21P Methamphetamine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.22C Any Use of Prescription Psychotherapeutics in Past Year and Misuse of Prescription Psychotherapeutics in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.22D Any Use of Prescription Psychotherapeutics in Past Year and Misuse of Prescription Psychotherapeutics in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 1.22P Any Use of Prescription Psychotherapeutics in Past Year and Misuse of Prescription Psychotherapeutics in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.23C Any Use of Pain Relievers in Past Year and Misuse of Pain Relievers in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.23D Any Use of Pain Relievers in Past Year and Misuse of Pain Relievers in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 1.23P Any Use of Pain Relievers in Past Year and Misuse of Pain Relievers in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.24C Any Use of Tranquilizers in Past Year and Misuse of Tranquilizers in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.24D Any Use of Tranquilizers in Past Year and Misuse of Tranquilizers in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 1.24P Any Use of Tranquilizers in Past Year and Misuse of Tranquilizers in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 1.25C Any Use of Stimulants in Past Year and Misuse of Stimulants in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.25D Any Use of Stimulants in Past Year and Misuse of Stimulants in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 1.25P Any Use of Stimulants in Past Year and Misuse of Stimulants in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.26C Any Use of Sedatives in Past Year and Misuse of Sedatives in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.26D Any Use of Sedatives in Past Year and Misuse of Sedatives in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 1.26P Any Use of Sedatives in Past Year and Misuse of Sedatives in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.27C Misuse of Opioids in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.27D Misuse of Opioids in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 1.27P Misuse of Opioids in Past Year and Past Month among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.28C Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older and Misuse of Prescription Psychotherapeutics in Past Year among Past Year Any Users Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.28D Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older and Misuse of Prescription Psychotherapeutics in Past Year among Past Year Any Users Aged 12 or Older, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 1.28P Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older and Misuse of Prescription Psychotherapeutics in Past Year among Past Year Any Users Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.29C Illicit Drug Use in Lifetime among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.29D Illicit Drug Use in Lifetime among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 1.29P Illicit Drug Use in Lifetime among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.30C Illicit Drug Use in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.30D Illicit Drug Use in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 1.30P Illicit Drug Use in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.31C Illicit Drug Use in Past Month among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.31D Illicit Drug Use in Past Month among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 1.31P Illicit Drug Use in Past Month among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 1.32C Marijuana Use in Lifetime among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 1.32D Marijuana Use in Lifetime among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 1.32P Marijuana Use in Lifetime among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

- 2.50C Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 20, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 2.50D Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 20, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 2.50P Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 20, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 2.51C Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 21 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 2.51D Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 21 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 2.51P Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 21 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 2.52C Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 12 to 20, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 2.52D Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 12 to 20, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 2.52P Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 12 to 20, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 2.53C Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 21 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 2.53D Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 21 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 2.53P Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 21 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 2.54C Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 20, by Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 2.54D Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 20, by Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 2.54P Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 20, by Geographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 2.55C Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 21 or Older, by Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 2.55D Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 21 or Older, by Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 2.55P Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 21 or Older, by Geographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 2.56C Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 12 to 20, by Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 2.56D Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 12 to 20, by Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 2.56P Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 12 to 20, by Geographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 2.57C Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 21 or Older, by Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 2.57D Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 21 or Older, by Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 2.57P Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 21 or Older, by Geographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 3.1C Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Persons Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.1D Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Persons Aged 12 or Older, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 3.1P Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Persons Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.2C Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Past Year Initiates of Specific Substances Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.2D Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Past Year Initiates of Specific Substances Aged 12 or Older, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 3.2P Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Past Year Initiates of Specific Substances Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.3C Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Persons Aged 12 or Older, by Specific Substance Use Initiation Status: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.3D Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Persons Aged 12 or Older, by Specific Substance Use Initiation Status: Standard Errors of Percentages, 2015 and 2016
- 3.3P Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Persons Aged 12 or Older, by Specific Substance Use Initiation Status: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.4C Perceived Great Risk of Harm Associated with Cigarette and Alcohol Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.4D Perceived Great Risk of Harm Associated with Cigarette and Alcohol Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.4P Perceived Great Risk of Harm Associated with Cigarette and Alcohol Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.5C Perceived Great Risk of Harm Associated with Cigarette and Alcohol Use among Persons Aged 12 to 20, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.5D Perceived Great Risk of Harm Associated with Cigarette and Alcohol Use among Persons Aged 12 to 20, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.5P Perceived Great Risk of Harm Associated with Cigarette and Alcohol Use among Persons Aged 12 to 20, by Demographic and Geographic Characteristics *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.6C Perceived Great Risk of Harm Associated with Marijuana and Cocaine Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.6D Perceived Great Risk of Harm Associated with Marijuana and Cocaine Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.6P Perceived Great Risk of Harm Associated with Marijuana and Cocaine Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 3.7C Perceived Great Risk of Harm Associated with Heroin and LSD Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.7D Perceived Great Risk of Harm Associated with Heroin and LSD Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.7P Perceived Great Risk of Harm Associated with Heroin and LSD Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.8C Perceived That Obtaining Specific Illicit Drugs Would Be Fairly or Very Easy among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.8D Perceived That Obtaining Specific Illicit Drugs Would Be Fairly or Very Easy among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.8P Perceived That Obtaining Specific Illicit Drugs Would Be Fairly or Very Easy among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.9C Youths Felt That Parents Would Strongly Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.9D Youths Felt That Parents Would Strongly Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.9P Youths Felt That Parents Would Strongly Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.10C Youths Felt That Close Friends Would Strongly Disapprove or Somewhat Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.10D Youths Felt That Close Friends Would Strongly Disapprove or Somewhat Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.10P Youths Felt That Close Friends Would Strongly Disapprove or Somewhat Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.11C Youths Strongly Disapproved or Somewhat Disapproved of Peers' Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.11D Youths Strongly Disapproved or Somewhat Disapproved of Peers' Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.11P Youths Strongly Disapproved or Somewhat Disapproved of Peers' Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.12C Participated in a Prevention Program or Group in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.12D Participated in a Prevention Program or Group in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.12P Participated in a Prevention Program or Group in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 3.13C Participated in a Substance Use Program or Exposed to Substance Use Prevention Message in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.13D Participated in a Substance Use Program or Exposed to Substance Use Prevention Message in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.13P Participated in a Substance Use Program or Exposed to Substance Use Prevention Message in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.14C Participated in a Physical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.14D Participated in a Physical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.14P Participated in a Physical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.15C Participated in a Nonphysical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.15D Participated in a Nonphysical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.15P Participated in a Nonphysical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.16C Selected Risk and Protective Factors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.16D Selected Risk and Protective Factors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.16P Selected Risk and Protective Factors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.17C Youths Agreed or Strongly Agreed with Statements about Religious Beliefs among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.17D Youths Agreed or Strongly Agreed with Statements about Religious Beliefs among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.17P Youths Agreed or Strongly Agreed with Statements about Religious Beliefs among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.18C Parents Always or Sometimes Took Part in Specific Behaviors in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.18D Parents Always or Sometimes Took Part in Specific Behaviors in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.18P Parents Always or Sometimes Took Part in Specific Behaviors in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.19C Measures of Student Characteristics in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.19D Measures of Student Characteristics in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.19P Measures of Student Characteristics in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 3.20C Adults Always or Sometimes Took Part in Specific School-Related Behaviors in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.20D Adults Always or Sometimes Took Part in Specific School-Related Behaviors in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.20P Adults Always or Sometimes Took Part in Specific School-Related Behaviors in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.21C Youths Perceived That All or Most Students in Grade Level Use Specific Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 3.21D Youths Perceived That All or Most Students in Grade Level Use Specific Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 3.21P Youths Perceived That All or Most Students in Grade Level Use Specific Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 3.22C Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Risk of Harm Associated with Substance Use Behaviors: Standard Errors of Numbers in Thousands, 2016
- 3.22D Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Risk of Harm Associated with Substance Use Behaviors: Standard Errors of Percentages, 2016
- 3.23C Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Availability of Selected Illicit Drugs: Standard Errors of Numbers in Thousands, 2016
- 3.23D Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Availability of Selected Illicit Drugs: Standard Errors of Percentages, 2016
- 3.24C Perceived Availability of Selected Illicit Drugs among Persons Aged 12 or Older, by Past Month Substance Use Status: Standard Errors of Numbers in Thousands, 2016
- 3.24D Perceived Availability of Selected Illicit Drugs among Persons Aged 12 or Older, by Past Month Substance Use Status: Standard Errors of Percentages, 2016
- 3.25C Perceived Availability of Selected Illicit Drugs among Persons Aged 12 to 17, by Past Month Substance Use Status: Standard Errors of Numbers in Thousands, 2016
- 3.25D Perceived Availability of Selected Illicit Drugs among Persons Aged 12 to 17, by Past Month Substance Use Status: Standard Errors of Percentages, 2016
- 3.26C Perceived Availability of Selected Illicit Drugs among Persons Aged 18 or Older, by Past Month Substance Use Status: Standard Errors of Numbers in Thousands, 2016
- 3.26D Perceived Availability of Selected Illicit Drugs among Persons Aged 18 or Older, by Past Month Substance Use Status: Standard Errors of Percentages, 2016
- 3.27C Perceived Availability of Selected Illicit Drugs among Persons Aged 18 to 25, by Past Month Substance Use Status: Standard Errors of Numbers in Thousands, 2016
- 3.27D Perceived Availability of Selected Illicit Drugs among Persons Aged 18 to 25, by Past Month Substance Use Status: Standard Errors of Percentages, 2016
- 3.28C Perceived Availability of Selected Illicit Drugs among Persons Aged 26 or Older, by Past Month Substance Use Status: Standard Errors of Numbers in Thousands, 2016
- 3.28D Perceived Availability of Selected Illicit Drugs among Persons Aged 26 or Older, by Past Month Substance Use Status: Standard Errors of Percentages, 2016
- 3.29C Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Parents' Feelings about Substance Use Behaviors: Standard Errors of Numbers in Thousands, 2016
- 3.29D Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Parents' Feelings about Substance Use Behaviors: Standard Errors of Percentages, 2016

LIST OF TABLES (Continued)

Table

- 3.30C Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Close Friends' Feelings and Youth's Feelings about Peers' Substance Use Behaviors: Standard Errors of Numbers in Thousands, 2016
- 3.30D Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Close Friends' Feelings and Youth's Feelings about Peers' Substance Use Behaviors: Standard Errors of Percentages, 2016
- 3.31C Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Youth's Participation in Prevention or Substance Use Programs and Exposure to Substance Use Prevention Messages and Youth's Delinquency in Past Year: Standard Errors of Numbers in Thousands, 2016
- 3.31D Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Youth's Participation in Prevention or Substance Use Programs and Exposure to Substance Use Prevention Messages and Youth's Delinquency in Past Year: Standard Errors of Percentages, 2016
- 3.32C Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Risk and Protective Factors, Religious Beliefs, and Past Year Parental Involvement: Standard Errors of Numbers in Thousands, 2016
- 3.32D Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Risk and Protective Factors, Religious Beliefs, and Past Year Parental Involvement: Standard Errors of Percentages, 2016
- 3.33C Past Month Use of Selected Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Measures of Scholastic Environment: Standard Errors of Numbers in Thousands, 2016
- 3.33D Past Month Use of Selected Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Measures of Scholastic Environment: Standard Errors of Percentages, 2016
- 4.1D Past Year Initiation of Marijuana Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Marijuana Use, and Past Year Marijuana Users Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 4.1P Past Year Initiation of Marijuana Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Marijuana Use, and Past Year Marijuana Users Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 4.2D Past Year Initiation of Cigarette Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Cigarette Use, and Past Year Cigarette Users Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 4.2P Past Year Initiation of Cigarette Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Cigarette Use, and Past Year Cigarette Users Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 4.3D Past Year Initiation of Alcohol Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Alcohol Use, and Past Year Alcohol Users Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 4.3P Past Year Initiation of Alcohol Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Alcohol Use, and Past Year Alcohol Users Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 4.4D Past Year Initiation of Substance Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 or Older: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 4.4P Past Year Initiation of Substance Use among Persons Aged 12 or Older, Persons Aged 12 or Older at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 or Older: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 4.5D Past Year Initiation of Substance Use among Persons Aged 12 to 17, Persons Aged 12 to 17 at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 to 17: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 4.5P Past Year Initiation of Substance Use among Persons Aged 12 to 17, Persons Aged 12 to 17 at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 to 17: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 4.6D Past Year Initiation of Substance Use among Persons Aged 18 or Older, Persons Aged 18 or Older at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 or Older: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 4.6P Past Year Initiation of Substance Use among Persons Aged 18 or Older, Persons Aged 18 or Older at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 or Older: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 4.7D Past Year Initiation of Substance Use among Persons Aged 18 to 25, Persons Aged 18 to 25 at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 to 25: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 4.7P Past Year Initiation of Substance Use among Persons Aged 18 to 25, Persons Aged 18 to 25 at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 to 25: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 4.8D Past Year Initiation of Substance Use among Persons Aged 26 or Older, Persons Aged 26 or Older at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 26 or Older: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 4.8P Past Year Initiation of Substance Use among Persons Aged 26 or Older, Persons Aged 26 or Older at Risk for Initiation of Substance Use, and Past Year Substance Users Aged 26 or Older: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 4.9C Past Year Initiation of Substance Use among Persons Aged 12 or Older, by Gender: Standard Errors of Numbers in Thousands, 2015 and 2016
- 4.10C Past Year Initiation of Substance Use among Persons Aged 12 or Older Who Initiated Use Prior to Age 18, by Gender: Standard Errors of Numbers in Thousands, 2015 and 2016
- 4.11C Past Year Initiation of Substance Use among Persons Aged 12 or Older Who Initiated Use Prior to Age 21, by Gender: Standard Errors of Numbers in Thousands, 2015 and 2016
- 4.12C Past Year Initiation of Substance Use among Persons Aged 12 to 49, by Gender: Standard Errors of Numbers in Thousands, 2015 and 2016
- 4.13D Standard Errors of Mean Age at First Substance Use among Past Year Initiates Aged 12 to 49, by Gender: 2015 and 2016
- 4.13P *P* Values from Tests of Differences of Mean Age at First Substance Use among Past Year Initiates Aged 12 to 49, by Gender: 2016 Versus 2015
- 5.1C Substance Use Disorder Status in Past Year among Persons Aged 12 or Older: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.1D Substance Use Disorder Status in Past Year among Persons Aged 12 or Older: Standard Errors of Percentages, 2015 and 2016
- 5.1P Substance Use Disorder Status in Past Year among Persons Aged 12 or Older: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.2C Substance Use Disorder for Specific Substances in Past Year among Persons Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.2D Substance Use Disorder for Specific Substances in Past Year among Persons Aged 12 or Older, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.2P Substance Use Disorder for Specific Substances in Past Year among Persons Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

- 5.3C Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.3D Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 5.3P Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.4C Illicit Drug Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.4D Illicit Drug Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.4P Illicit Drug Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.5C Alcohol Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.5D Alcohol Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.5P Alcohol Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.6C Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.6D Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.6P Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.7C Illicit Drug Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.7D Illicit Drug Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.7P Illicit Drug Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.8C Alcohol Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.8D Alcohol Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.8P Alcohol Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.9C Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.9D Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.9P Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.10C Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.10D Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 5.10P Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

5.11C	Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
5.11D	Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
5.11P	Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
5.12C	Received Alcohol Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
5.12D	Received Alcohol Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
5.12P	Received Alcohol Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
5.13C	Received Both Illicit Drug and Alcohol Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
5.13D	Received Both Illicit Drug and Alcohol Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
5.13P	Received Both Illicit Drug and Alcohol Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
5.14C	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
5.14D	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
5.14P	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
5.15C	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
5.15D	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2015 and 2016
5.15P	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
5.16C	Type of Substance Use Treatment Received at Any Location in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
5.16D	Type of Substance Use Treatment Received at Any Location in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
5.16P	Type of Substance Use Treatment Received at Any Location in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use in Past Year, by Age Group: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
5.17C	Substances for Which Last or Current Treatment Was Received among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
5.17D	Substances for Which Last or Current Treatment Was Received among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
5.17P	Substances for Which Last or Current Treatment Was Received among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 5.18C Locations Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.18D Locations Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.18P Locations Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.19C Locations Received Alcohol Treatment in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.19D Locations Received Alcohol Treatment in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.19P Locations Received Alcohol Treatment in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.20C Locations Received Substance Use Treatment in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.20D Locations Received Substance Use Treatment in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.20P Locations Received Substance Use Treatment in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.21C Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.21D Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 5.21P Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.22C Received Illicit Drug Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.22D Received Illicit Drug Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.22P Received Illicit Drug Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.23C Received Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.23D Received Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.23P Received Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 5.24C Received Both Illicit Drug and Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.24D Received Both Illicit Drug and Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.24P Received Both Illicit Drug and Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.25C Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.25D Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.25P Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.26C Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.26D Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.26P Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.27C Type of Substance Use Treatment Received at a Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.27D Type of Substance Use Treatment Received at a Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.27P Type of Substance Use Treatment Received at a Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use at a Specialty Facility in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.28C Substances for Which Last or Current Treatment Was Received among Persons Aged 12 or Older Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.28D Substances for Which Last or Current Treatment Was Received among Persons Aged 12 or Older Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.28P Substances for Which Last or Current Treatment Was Received among Persons Aged 12 or Older Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.29C Locations Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.29D Locations Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.29P Locations Received Illicit Drug Treatment in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 5.30C Locations Received Alcohol Treatment in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.30D Locations Received Alcohol Treatment in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.30P Locations Received Alcohol Treatment in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.31C Locations Received Substance Use Treatment in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.31D Locations Received Substance Use Treatment in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.31P Locations Received Substance Use Treatment in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.32C Source of Payment for Last or Current Illicit Drug Treatment among Persons Aged 12 or Older Who Received Their Last or Current Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.32D Source of Payment for Last or Current Illicit Drug Treatment among Persons Aged 12 or Older Who Received Their Last or Current Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.32P Source of Payment for Last or Current Illicit Drug Treatment among Persons Aged 12 or Older Who Received Their Last or Current Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.33C Source of Payment for Last or Current Alcohol Treatment among Persons Aged 12 or Older Who Received Their Last or Current Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.33D Source of Payment for Last or Current Alcohol Treatment among Persons Aged 12 or Older Who Received Their Last or Current Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.33P Source of Payment for Last or Current Alcohol Treatment among Persons Aged 12 or Older Who Received Their Last or Current Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.34C Source of Payment for Last or Current Substance Use Treatment among Persons Aged 12 or Older Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.34D Source of Payment for Last or Current Substance Use Treatment among Persons Aged 12 or Older Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.34P Source of Payment for Last or Current Substance Use Treatment among Persons Aged 12 or Older Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.35C Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder of Specific Substances: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.35D Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder of Specific Substances: Standard Errors of Percentages, 2015 and 2016
- 5.35P Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder of Specific Substances: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 5.36C Type of Substance Use Treatment Received at Any Location or at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.36D Type of Substance Use Treatment Received at Any Location or at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.36P Type of Substance Use Treatment Received at Any Location or at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.37C Receipt of Substance Use Treatment at a Specialty Facility and/or a Non-Specialty Facility and Type of Substance Use Treatment Received in Past Year among Persons Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.37D Receipt of Substance Use Treatment at a Specialty Facility and/or a Non-Specialty Facility and Type of Substance Use Treatment Received in Past Year among Persons Aged 12 or Older, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.37P Receipt of Substance Use Treatment at a Specialty Facility and/or a Non-Specialty Facility and Type of Substance Use Treatment Received in Past Year among Persons Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.38C Received Illicit Drug Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.38D Received Illicit Drug Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.38P Received Illicit Drug Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.39C Received Alcohol Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.39D Received Alcohol Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.39P Received Alcohol Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.40C Received Substance Use Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.40D Received Substance Use Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
- 5.40P Received Substance Use Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Substance Use Treatment in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.41C Type of Substance Use Treatment Received at Any Treatment Location or at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder Status: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.41D Type of Substance Use Treatment Received at Any Treatment Location or at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder Status: Standard Errors of Percentages, 2015 and 2016
- 5.41P Type of Substance Use Treatment Received at Any Treatment Location or at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder Status: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 5.42C Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 5.42D Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 5.42P Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.43C Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 5.43D Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.43P Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.44C Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 5.44D Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.44P Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.45C Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 5.45D Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.45P Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Geographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.46C Perceived Need for Illicit Drug Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug Problem, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.46D Perceived Need for Illicit Drug Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug Problem, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.46P Perceived Need for Illicit Drug Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug Problem, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.47C Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 5.47D Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.47P Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

- 5.48C Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 5.48D Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.48P Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.49C Perceived Need for Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Alcohol Problem, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.49D Perceived Need for Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Alcohol Problem, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.49P Perceived Need for Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Alcohol Problem, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.50C Need for and Receipt of Treatment at a Specialty Facility for a Substance Use Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 5.50D Need for and Receipt of Treatment at a Specialty Facility for a Substance Use Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.50P Need for and Receipt of Treatment at a Specialty Facility for a Substance Use Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.51C Need for and Receipt of Treatment at a Specialty Facility for a Substance Use Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 5.51D Need for and Receipt of Treatment at a Specialty Facility for a Substance Use Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.51P Need for and Receipt of Treatment at a Specialty Facility for a Substance Use Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.52C Perceived Need for Substance Use Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for a Substance Use Problem, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 5.52D Perceived Need for Substance Use Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for a Substance Use Problem, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 5.52P Perceived Need for Substance Use Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for a Substance Use Problem, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 5.53C Detailed Reasons for Not Receiving Substance Use Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Substance Use Treatment at a Specialty Facility and Who Felt a Need for Substance Use Treatment in Past Year: Standard Errors of Numbers in Thousands, 2016
- 5.53D Detailed Reasons for Not Receiving Substance Use Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Substance Use Treatment at a Specialty Facility and Who Felt a Need for Substance Use Treatment in Past Year: Standard Errors of Percentages, 2016

LIST OF TABLES (Continued)

Table

- 5.54C Detailed Reasons for Not Receiving Substance Use Treatment in Past Year among Persons Aged 18 or Older Classified as Needing But Not Receiving Substance Use Treatment at a Specialty Facility and Who Felt a Need for Substance Use Treatment in Past Year: Standard Errors of Numbers in Thousands, 2016
- 5.54D Detailed Reasons for Not Receiving Substance Use Treatment in Past Year among Persons Aged 18 or Older Classified as Needing But Not Receiving Substance Use Treatment at a Specialty Facility and Who Felt a Need for Substance Use Treatment in Past Year: Standard Errors of Percentages, 2016
- 6.1C Number of Days Used Marijuana in Past Year among Past Year Users and Number of Days Used Marijuana in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands and Averages, 2015 and 2016
- 6.1D Number of Days Used Marijuana in Past Year among Past Year Users and Number of Days Used Marijuana in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Percentages and Averages, 2015 and 2016
- 6.1P Number of Days Used Marijuana in Past Year among Past Year Users and Number of Days Used Marijuana in Past Month among Past Month Users Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages and Averages, 2016 Versus 2015
- 6.2C Number of Days Used Cocaine in Past Year among Past Year Users and Number of Days Used Cocaine in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands and Averages, 2015 and 2016
- 6.2D Number of Days Used Cocaine in Past Year among Past Year Users and Number of Days Used Cocaine in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Percentages and Averages, 2015 and 2016
- 6.2P Number of Days Used Cocaine in Past Year among Past Year Users and Number of Days Used Cocaine in Past Month among Past Month Users Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages and Averages, 2016 Versus 2015
- 6.3C Number of Days Used Hallucinogens in Past Year among Past Year Users and Number of Days Used Hallucinogens in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands and Averages, 2015 and 2016
- 6.3D Number of Days Used Hallucinogens in Past Year among Past Year Users and Number of Days Used Hallucinogens in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Percentages and Averages, 2015 and 2016
- 6.3P Number of Days Used Hallucinogens in Past Year among Past Year Users and Number of Days Used Hallucinogens in Past Month among Past Month Users Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages and Averages, 2016 Versus 2015
- 6.4C Number of Days Used Inhalants in Past Year among Past Year Users and Number of Days Used Inhalants in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands and Averages, 2015 and 2016
- 6.4D Number of Days Used Inhalants in Past Year among Past Year Users and Number of Days Used Inhalants in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Percentages and Averages, 2015 and 2016
- 6.4P Number of Days Used Inhalants in Past Year among Past Year Users and Number of Days Used Inhalants in Past Month among Past Month Users Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages and Averages, 2016 Versus 2015
- 6.5C Number of Days Used Methamphetamine in Past Year among Past Year Users and Number of Days Used Methamphetamine in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands and Averages, 2015 and 2016
- 6.5D Number of Days Used Methamphetamine in Past Year among Past Year Users and Number of Days Used Methamphetamine in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Percentages and Averages, 2015 and 2016
- 6.5P Number of Days Used Methamphetamine in Past Year among Past Year Users and Number of Days Used Methamphetamine in Past Month among Past Month Users Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages and Averages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

- 6.6C Number of Days Misused Prescription Psychotherapeutics in Past Month among Past Month Misusers Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands and Averages, 2015 and 2016
- 6.6D Number of Days Misused Prescription Psychotherapeutics in Past Month among Past Month Misusers Aged 12 or Older, by Age Group: Standard Errors of Percentages and Averages, 2015 and 2016
- 6.6P Number of Days Misused Prescription Psychotherapeutics in Past Month among Past Month Misusers Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages and Averages, 2016 Versus 2015
- 6.7C Number of Days Used Cigarettes in Past Month among Past Month Users and Number of Cigarettes Smoked Per Day among Daily Smokers Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands and Averages, 2015 and 2016
- 6.7D Number of Days Used Cigarettes in Past Month among Past Month Users and Number of Cigarettes Smoked Per Day among Daily Smokers Aged 12 or Older, by Age Group: Standard Errors of Percentages and Averages, 2015 and 2016
- 6.7P Number of Days Used Cigarettes in Past Month among Past Month Users and Number of Cigarettes Smoked Per Day among Daily Smokers Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages and Averages, 2016 Versus 2015
- 6.8C Number of Days Used Alcohol in Past Year among Past Year Users and Number of Days Used Alcohol in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands and Averages, 2015 and 2016
- 6.8D Number of Days Used Alcohol in Past Year among Past Year Users and Number of Days Used Alcohol in Past Month among Past Month Users Aged 12 or Older, by Age Group: Standard Errors of Percentages and Averages, 2015 and 2016
- 6.8P Number of Days Used Alcohol in Past Year among Past Year Users and Number of Days Used Alcohol in Past Month among Past Month Users Aged 12 or Older, by Age Group: *P* Values from Tests of Differences of Percentages and Averages, 2016 Versus 2015
- 6.9C Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Standard Errors of Numbers in Thousands, 2015 and 2016
- 6.9D Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Standard Errors of Percentages, 2015 and 2016
- 6.9P Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 6.10C Any Use and Misuse of Pain Relievers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Standard Errors of Numbers in Thousands, 2015 and 2016
- 6.10D Any Use and Misuse of Pain Relievers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Standard Errors of Percentages, 2015 and 2016
- 6.10P Any Use and Misuse of Pain Relievers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 6.11C Any Use and Misuse of Tranquilizers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Standard Errors of Numbers in Thousands, 2015 and 2016
- 6.11D Any Use and Misuse of Tranquilizers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: Standard Errors of Percentages, 2015 and 2016
- 6.11P Any Use and Misuse of Tranquilizers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Psychotherapeutic Use in Past Year: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

- 6.45C Marijuana Use in Prior Year and Past Year Marijuana Use Status among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 6.45D Marijuana Use in Prior Year and Past Year Marijuana Use Status among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 6.45P Marijuana Use in Prior Year and Past Year Marijuana Use Status among Persons Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 6.46C Cigarette Use and Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2015 and 2016
- 6.46D Cigarette Use and Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2015 and 2016
- 6.46P Cigarette Use and Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 6.47C Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 6.47D Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 6.47P Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 6.48C Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 6.48D Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 6.48P Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Geographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 6.49C Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 6.49D Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 6.49P Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 6.50C Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes Daily and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 6.50D Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes Daily and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 6.50P Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes Daily and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015
- 6.51C Illicit Drug Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Marijuana and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
- 6.51D Illicit Drug Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Marijuana and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
- 6.51P Illicit Drug Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Marijuana and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2016 Versus 2015

LIST OF TABLES (Continued)

Table

6.52C	Alcohol Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Alcohol and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2015 and 2016
6.52D	Alcohol Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Alcohol and Demographic Characteristics: Standard Errors of Percentages, 2015 and 2016
6.52P	Alcohol Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Alcohol and Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
6.53C	Source Where Pain Relievers Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
6.53D	Source Where Pain Relievers Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Standard Errors of Percentages, 2015 and 2016
6.53P	Source Where Pain Relievers Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
6.54C	Source Where Friend or Relative Obtained Pain Relievers among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Pain Relievers from a Friend or Relative for Free in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
6.54D	Source Where Friend or Relative Obtained Pain Relievers among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Pain Relievers from a Friend or Relative for Free in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
6.54P	Source Where Friend or Relative Obtained Pain Relievers among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Pain Relievers from a Friend or Relative for Free in Past Year, by Age Group: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
6.55C	Source Where Tranquilizers Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
6.55D	Source Where Tranquilizers Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Standard Errors of Percentages, 2015 and 2016
6.55P	Source Where Tranquilizers Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
6.56C	Source Where Friend or Relative Obtained Tranquilizers among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Tranquilizers from a Friend or Relative for Free in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
6.56D	Source Where Friend or Relative Obtained Tranquilizers among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Tranquilizers from a Friend or Relative for Free in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
6.56P	Source Where Friend or Relative Obtained Tranquilizers among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Tranquilizers from a Friend or Relative for Free in Past Year, by Age Group: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
6.57C	Source Where Stimulants Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
6.57D	Source Where Stimulants Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: Standard Errors of Percentages, 2015 and 2016
6.57P	Source Where Stimulants Were Obtained for Most Recent Misuse among Past Year Misusers Aged 12 or Older, by Age Group: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015
6.58C	Source Where Friend or Relative Obtained Stimulants among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Stimulants from a Friend or Relative for Free in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2015 and 2016
6.58D	Source Where Friend or Relative Obtained Stimulants among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Stimulants from a Friend or Relative for Free in Past Year, by Age Group: Standard Errors of Percentages, 2015 and 2016
6.58P	Source Where Friend or Relative Obtained Stimulants among Past Year Misusers Aged 12 or Older Who Obtained Most Recently Misused Stimulants from a Friend or Relative for Free in Past Year, by Age Group: <i>P</i> Values from Tests of Differences of Percentages, 2016 Versus 2015

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

⁴ Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

⁴ Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

⁴ Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

⁴ Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Opioid misuse refers to the use of heroin or the misuse of prescription pain relievers. Misuse of prescription pain relievers is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor.

Prescription pain relievers do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

NOTE: Opioid misuse refers to the use of heroin or the misuse of prescription pain relievers. Misuse of prescription pain relievers is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor.

Prescription pain relievers do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Includes *hydrocodone products* (Vicodin[®], Lortab[®], Norco[®], Zohydro[®] ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin[®], Percocet[®], Percodan[®], Roxicet[®] [2015 only], Roxicodone[®], generic oxycodone, or other similar products); *tramadol products* (Ultram[®], Ultram[®] ER, Ultracet[®], generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol[®] with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza[®], Kadian[®], MS Contin[®], generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Actiq[®] [2015 only], Duragesic[®], Fentora[®], generic fentanyl, or other similar products); *buprenorphine products* (Suboxone[®], generic buprenorphine, generic buprenorphine plus naloxone [2016 only], or other similar products); *oxymorphone products* (Opana[®], Opana[®] ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol[®] or other similar products); *hydromorphone products* (Dilaudid[®] or generic hydromorphone, Exalgo[®] or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

² Includes use or misuse of pain relievers containing other active ingredients. A small number of respondents who reported misuse of "any other prescription pain reliever" corresponding only to the specific pain reliever categories shown in the table are included in estimates for Any Other Prescription Pain Reliever and are also included in the relevant pain reliever category.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Includes *hydrocodone products* (Vicodin[®], Lortab[®], Norco[®], Zohydro[®] ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin[®], Percocet[®], Percodan[®], Roxicet[®] [2015 only], Roxicodone[®], generic oxycodone, or other similar products); *tramadol products* (Ultram[®], Ultram[®] ER, Ultracet[®], generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol[®] with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza[®], Kadian[®], MS Contin[®], generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Actiq[®] [2015 only], Duragesic[®], Fentora[®], generic fentanyl, or other similar products); *buprenorphine products* (Suboxone[®], generic buprenorphine, generic buprenorphine plus naloxone [2016 only], or other similar products); *oxymorphone products* (Opana[®], Opana[®] ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol[®] or other similar products); *hydromorphone products* (Dilaudid[®] or generic hydromorphone, Exalgo[®] or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

² Includes use or misuse of pain relievers containing other active ingredients. A small number of respondents who reported misuse of "any other prescription pain reliever" corresponding only to the specific pain reliever categories shown in the table are included in estimates for Any Other Prescription Pain Reliever and are also included in the relevant pain reliever category.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Includes *benzodiazepine tranquilizers* (see footnote 2); *muscle relaxants* (see footnote 3); *bupirone products* (also known as BuSpar[®] or other similar products) [2015 only], *hydroxyzine products* (also known as Atarax[®] or Vistaril[®] or similar products) [2015 only], *meprobamate products* (also known as Equanil[®] or Miltown[®] or similar products) [2015 only], or any other prescription tranquilizer (see footnote 4).

² Includes *alprazolam products* (Xanax[®], Xanax[®] XR, generic alprazolam, generic extended-release alprazolam, or other similar products); *lorazepam products* (Ativan[®], generic lorazepam, or other similar products); *clonazepam products* (Klonopin[®], generic clonazepam, or other similar products); *diazepam products* (Valium[®], generic diazepam, or other similar products); or other benzodiazepine tranquilizers that were specified for misuse of "any other prescription tranquilizer."

³ Includes *cyclobenzaprine products* (Flexeril[®], generic cyclobenzaprine, or other similar products); *carisoprodol products* (Soma[®] or other similar products); or other muscle relaxants that were specified for misuse of "any other prescription tranquilizer."

⁴ Includes use or misuse of tranquilizers containing other active ingredients. A small number of respondents who reported misuse of "any other prescription tranquilizer" corresponding only to the specific tranquilizer categories shown in the table are included in estimates for Any Other Prescription Tranquilizer and are also included in the relevant tranquilizer category.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

^a The difference between this estimate and the 2016 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2016 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Includes *amphetamine products* (Adderall[®], Adderall[®] XR, Dexedrine[®], Vyvanse[®], generic dextroamphetamine, generic amphetamine-dextroamphetamine combinations, generic extended-release amphetamine-dextroamphetamine combinations, or similar products); *methylphenidate products* (Ritalin[®], Ritalin[®] SR [2015 only], Ritalin[®] LA, Concerta[®], Daytrana[®], Metadate CD, Metadate ER, Focalin, Focalin XR, generic methylphenidate, generic extended-release methylphenidate, generic dexmethylphenidate, generic extended-release dexmethylphenidate, or similar products); *anorectic (weight-loss) stimulants* (Didrex[®], benzphetamine, Tenuate[®], diethylpropion, phendimetrazine, phentermine or similar products); *modafinil products* (Provigil[®] or other similar products); or any other prescription stimulant.

² Includes amphetamine and methylphenidate products that are primarily prescribed for the treatment of attention-deficit/hyperactivity disorder (ADHD). Vyvanse[®] is included with amphetamine products because its active ingredient (lisdexamfetamine) is metabolized to dextroamphetamine.

³ Includes use or misuse of stimulants containing other active ingredients. A small number of respondents who reported misuse of "any other prescription stimulant" corresponding only to the specific stimulant categories shown in the table are included in estimates for Any Other Prescription Stimulant and are also included in the relevant stimulant category.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

⁴ Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2015 and 2016.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

⁴ Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

⁴ Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

⁴ Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Opioid misuse refers to the use of heroin or the misuse of prescription pain relievers. Misuse of prescription pain relievers is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor.

Prescription pain relievers do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Opioid misuse refers to the use of heroin or the misuse of prescription pain relievers. Misuse of prescription pain relievers is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor.

Prescription pain relievers do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2015 and 2016.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2015 and 2016.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

NOTE: Opioid misuse refers to the use of heroin or the misuse of prescription pain relievers. Misuse of prescription pain relievers is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor.

Prescription pain relievers do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2015 and 2016.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Cocaine use includes the use of crack.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Opioid misuse refers to the use of heroin or the misuse of prescription pain relievers. Misuse of prescription pain relievers is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription pain relievers do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Opioid misuse refers to the use of heroin or the misuse of prescription pain relievers. Misuse of prescription pain relievers is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription pain relievers do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ County Type is based on the 2013 Rural-Urban Continuum Codes.

² Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

³ Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

⁴ CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

⁵ Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ Includes *hydrocodone products* (Vicodin[®], Lortab[®], Norco[®], Zohydro[®] ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin[®], Percocet[®], Percodan[®], Roxicet[®] [2015 only], Roxicodone[®], generic oxycodone, or other similar products); *tramadol products* (Ultram[®], Ultram[®] ER, Ultracet[®], generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol[®] with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza[®], Kadian[®], MS Contin[®], generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Actiq[®] [2015 only], Duragesic[®], Fentora[®], generic fentanyl, or other similar products); *buprenorphine products* (Suboxone[®], generic buprenorphine, generic buprenorphine plus naloxone [2016 only], or other similar products); *oxymorphone products* (Opana[®], Opana[®] ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol[®] or other similar products); *hydromorphone products* (Dilaudid[®] or generic hydromorphone, Exalgo[®] or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

² Includes use or misuse of pain relievers containing other active ingredients. A small number of respondents who reported misuse of "any other prescription pain reliever" corresponding only to the specific pain reliever categories shown in the table are included in estimates for Any Other Prescription Pain Reliever and are also included in the relevant pain reliever category.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ Includes *hydrocodone products* (Vicodin[®], Lortab[®], Norco[®], Zohydro[®] ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin[®], Percocet[®], Percodan[®], Roxicet[®] [2015 only], Roxicodone[®], generic oxycodone, or other similar products); *tramadol products* (Ultram[®], Ultram[®] ER, Ultracet[®], generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol[®] with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza[®], Kadian[®], MS Contin[®], generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Actiq[®] [2015 only], Duragesic[®], Fentora[®], generic fentanyl, or other similar products); *buprenorphine products* (Suboxone[®], generic buprenorphine, generic buprenorphine plus naloxone [2016 only], or other similar products); *oxymorphone products* (Opana[®], Opana[®] ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol[®] or other similar products); *hydromorphone products* (Dilaudid[®] or generic hydromorphone, Exalgo[®] or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

² Includes use or misuse of pain relievers containing other active ingredients. A small number of respondents who reported misuse of "any other prescription pain reliever" corresponding only to the specific pain reliever categories shown in the table are included in estimates for Any Other Prescription Pain Reliever and are also included in the relevant pain reliever category.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ Includes *hydrocodone products* (Vicodin[®], Lortab[®], Norco[®], Zohydro[®] ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin[®], Percocet[®], Percodan[®], Roxicet[®] [2015 only], Roxicodone[®], generic oxycodone, or other similar products); *tramadol products* (Ultram[®], Ultram[®] ER, Ultracet[®], generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol[®] with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza[®], Kadian[®], MS Contin[®], generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Actiq[®] [2015 only], Duragesic[®], Fentora[®], generic fentanyl, or other similar products); *buprenorphine products* (Suboxone[®], generic buprenorphine, generic buprenorphine plus naloxone [2016 only], or other similar products); *oxymorphone products* (Opana[®], Opana[®] ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol[®] or other similar products); *hydromorphone products* (Dilaudid[®] or generic hydromorphone, Exalgo[®] or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

² Includes use or misuse of pain relievers containing other active ingredients. A small number of respondents who reported misuse of "any other prescription pain reliever" corresponding only to the specific pain reliever categories shown in the table are included in estimates for Any Other Prescription Pain Reliever and are also included in the relevant pain reliever category.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutic subtypes were revised in 2016; one effect was the comparability of codeine products between 2015 and 2016.

¹ Includes *hydrocodone products* (Vicodin[®], Lortab[®], Norco[®], Zohydro[®] ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin[®], Percocet[®], Percodan[®], Roxicet[®] [2015 only], Roxicodone[®], generic oxycodone, or other similar products); *tramadol products* (Ultram[®], Ultram[®] ER, Ultracet[®], generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol[®] with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza[®], Kadian[®], MS Contin[®], generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Actiq[®] [2015 only], Duragesic[®], Fentora[®], generic fentanyl, or other similar products); *buprenorphine products* (Suboxone[®], generic buprenorphine, generic buprenorphine plus naloxone [2016 only], or other similar products); *oxymorphone products* (Opana[®], Opana[®] ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol[®] or other similar products); *hydromorphone products* (Dilaudid[®] or generic hydromorphone, Exalgo[®] or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

² Includes use or misuse of pain relievers containing other active ingredients. A small number of respondents who reported misuse of "any other prescription pain reliever" corresponding only to the specific pain reliever categories shown in the table are included in estimates for Any Other Prescription Pain Reliever and are also included in the relevant pain reliever category.
