BY WASATCH CREST TREATMENT SERVICES

A Women's Residential Treatment Program

Nuanced Treatment

Research shows that gender-specific treatment for women increases success by more than 40%. At Jupiter, we offer a clinical curriculum specifically designed for women's needs. By integrating therapeutic strategies like dialectical behavior therapy (DBT), motivational interviewing (MI), and grief and loss therapy, we create a nurturing environment for recovery, resilience, and renewal. With a graduation rate exceeding 90%, Jupiter provides a springboard for women to embark on new chapters in their lives.

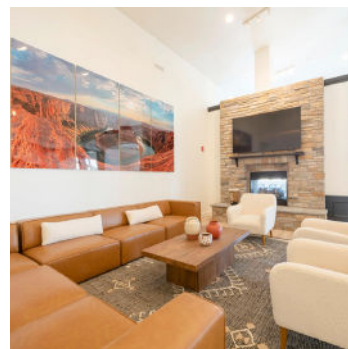

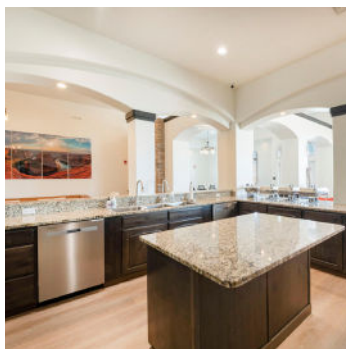

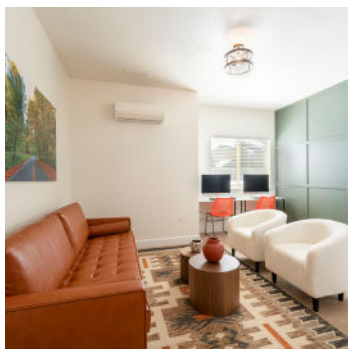

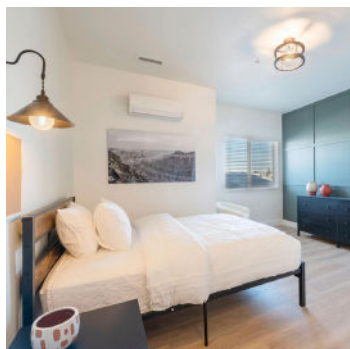

A Gender-Specific Continuum of Care

After Jupiter, clients often transition to our outpatient treatment and transitional living programs. By offering a seamless continuum of care, we intend to help individuals not only overcome substance use, but also cultivate a fulfilling, joyful life.

Elevated Mountainside Recovery

Located in Park City and named after the region's most prominent peak, the 10,000-square-foot Jupiter residence in Park City offers refuge for women starting their recovery. The alpine setting provides an ideal natural landscape for outdoor therapeutic experiences that inspire self-discovery and personal growth.

In-network with most insurance providers and select Medicaid providers.
